UC-ONE RECEPTIONIST CONSOLE SOLUTION OVERVIEW

When a SmartVoice Collaborative UC-One user is migrated to the new SmartVoice with Cisco Webex service, the UC-One Receptionist Console user will be unable to chat, send messages or view the presence and availability of their contacts inside the Receptionist Console.

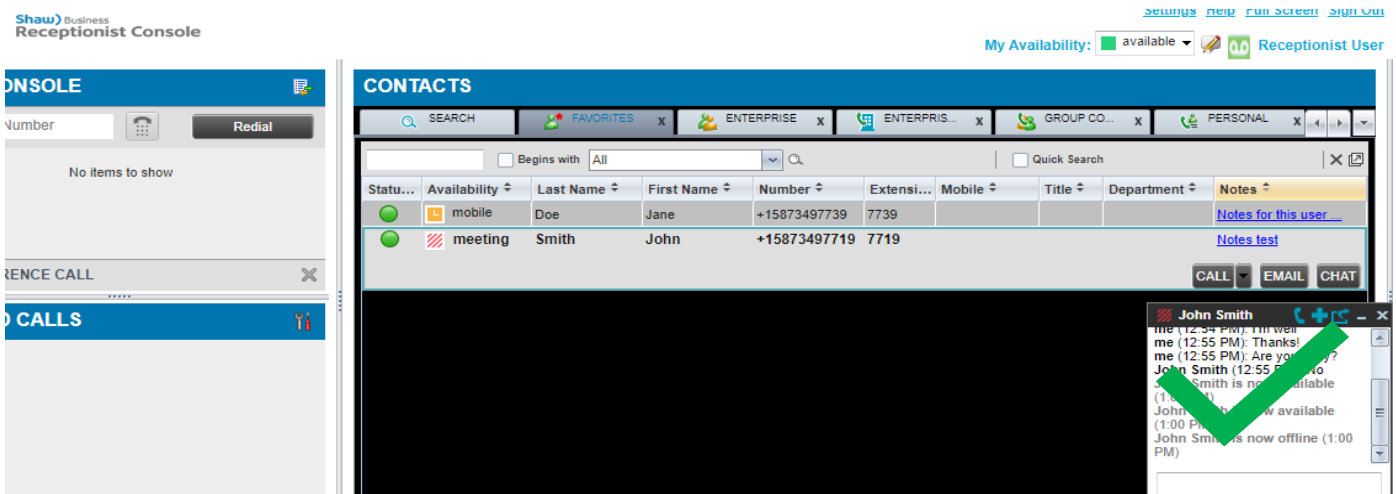

This solution guide provides an overview on how the UC-One Receptionist Console user can use the UC-One Receptionist Console alongside Webex to communicate with their contacts.

The UC-One Receptionist Console user can use their Webex app to chat, send messages and see their contact's presence. Only a SmartVoice Collaborative UC-One user migrated to Webex will still be able to see their Telephony presence.

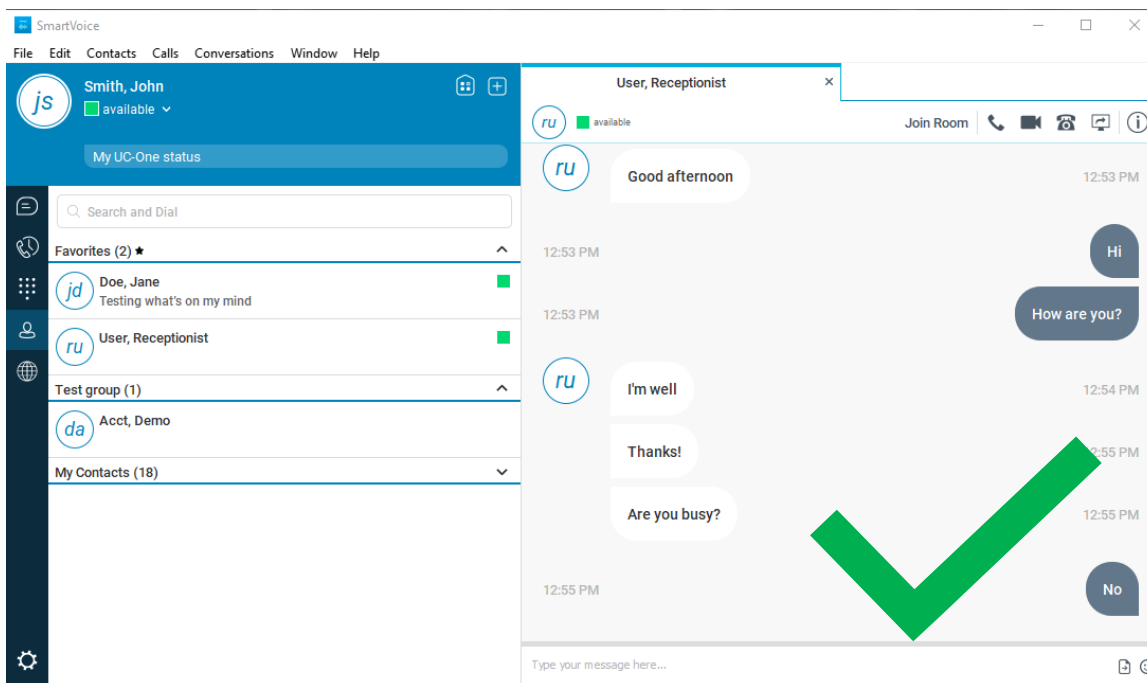

CHAT FUNCTIONALITY

At present, a UC-One Receptionist Console user can initiate chat with a contact person from within the console by clicking on the “chat” icon to start messaging. The SmartVoice Collaborative UC-One will then receive the message and continue their conversation.

UC-One Receptionist Console

SmartVoice Collaborative UC-One App

Once the SmartVoice Collaborative UC-One user is migrated to Webex, their availability in the Receptionist Console will now appear offline and they will not receive chat messages from the UC-One Receptionist Console user.

My Availability: available Receptionist User

| Statu... | Availability | Last Name | First Name | Number | Extensi... | Mobile | Title | Department | Notes |
|----------|--------------|-----------|------------|--------------|------------|--------|-------|------------|-------------------------|
| ● | mobile | Doe | Jane | +15873497739 | 7739 | | | | Notes for this user ... |
| ● | | Smith | John | +15873497719 | 7719 | | | | Notes test |

5873497719@sh. + + +

me (1:12 PM): Hi John
me (1:13 PM): Hello
me (1:13 PM): Are you there?

Webex

The UC-One Receptionist Console user can initiate chat in the UC-One application, but the recipient in Webex will not receive any messages. They must chat with the recipient in Webex.

John status in Webex

Webex space for John

Welcome to Webex

On desktop, use the + button at the top of the app to create spaces, meet and call. You can search up there too!

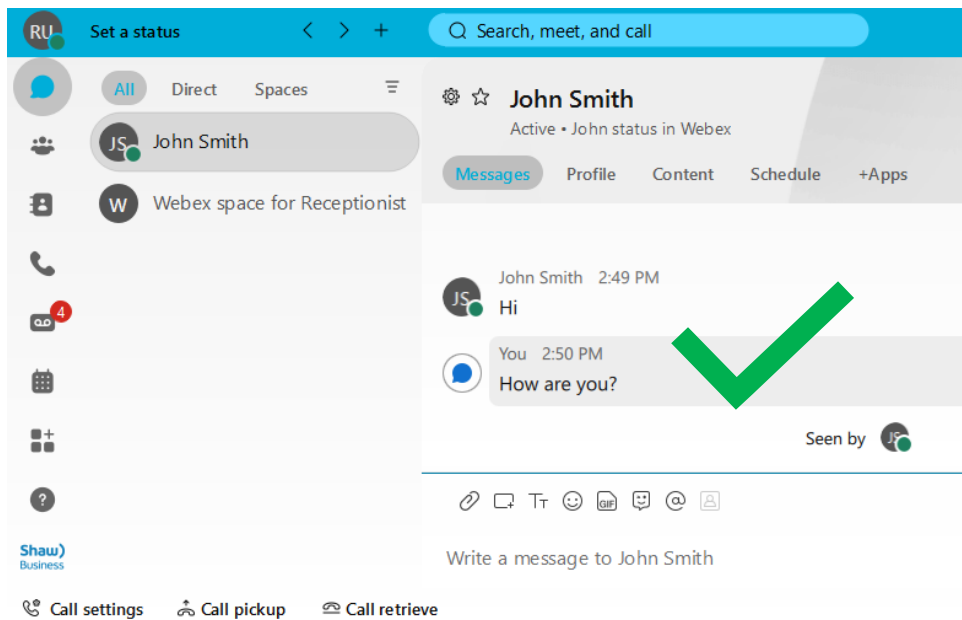

Personalize Webex and set your preferences

Click your avatar to set your status, change notification settings and download the mobile app.

Write a message to Webex space for John

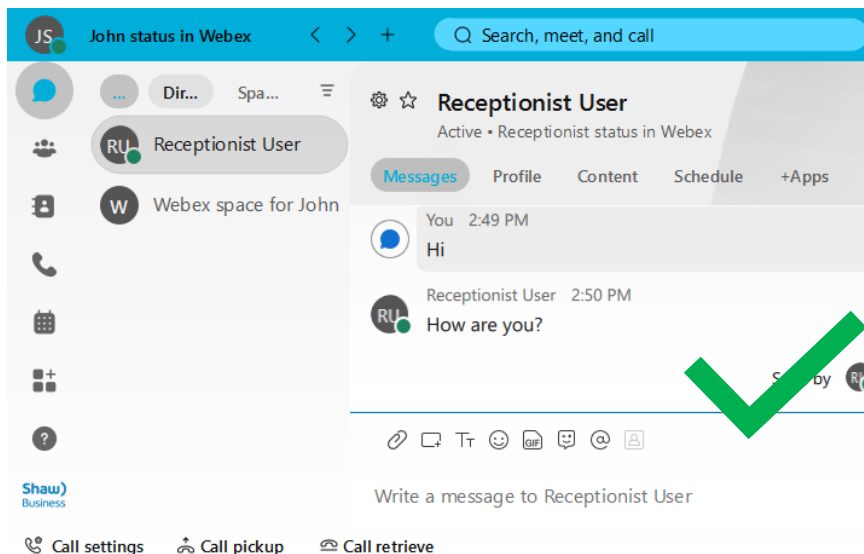

The UC-One Receptionist Console user can open their Webex application, search for the contact “John Smith” and initiate chat.

UC-One Receptionist Console User in Webex

Recipient User in Webex

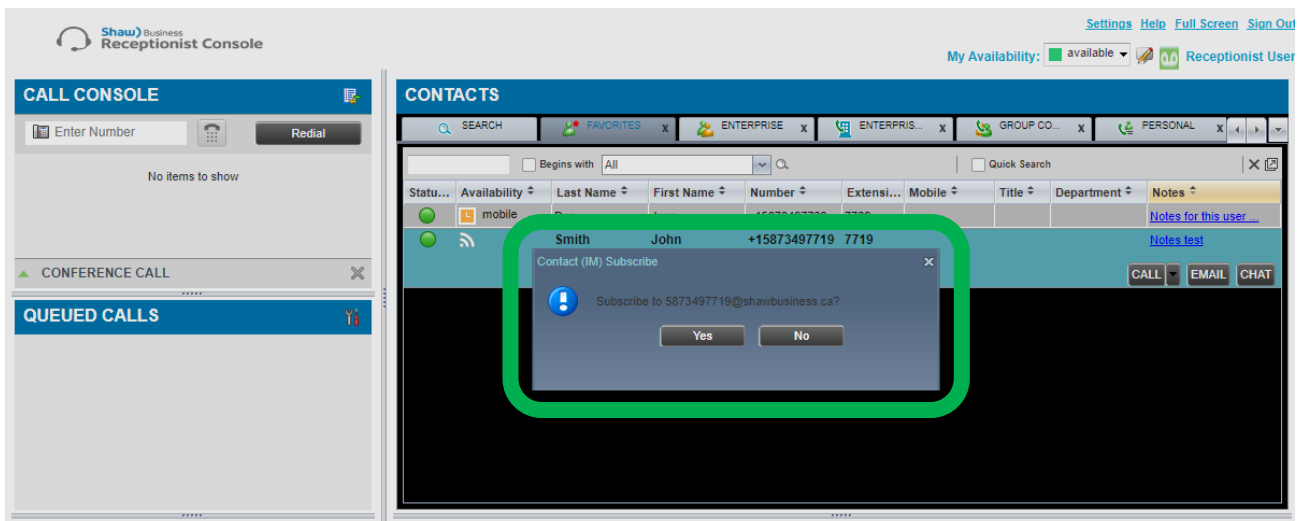

The Receptionist User is able to continue their conversations with the Receptionist Console user.

SUBSCRIPTION TO CONTACTS TO SHARE PRESENCE AND AVAILABILITY

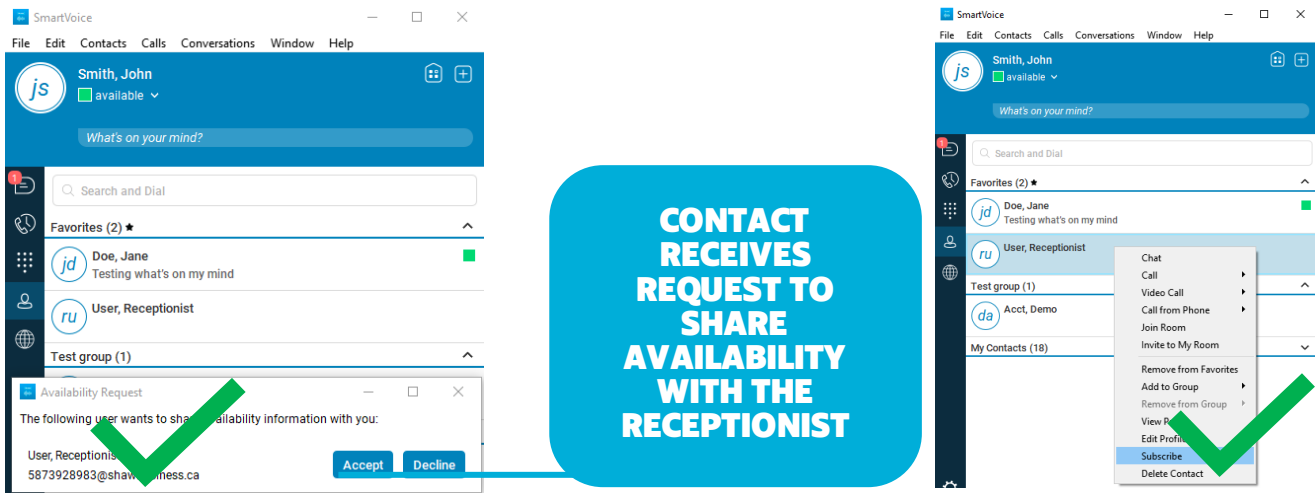

In the Receptionist Console, the user can subscribe to a contact “John Smith” to share their availability as depicted below.

UC-One Receptionist Console

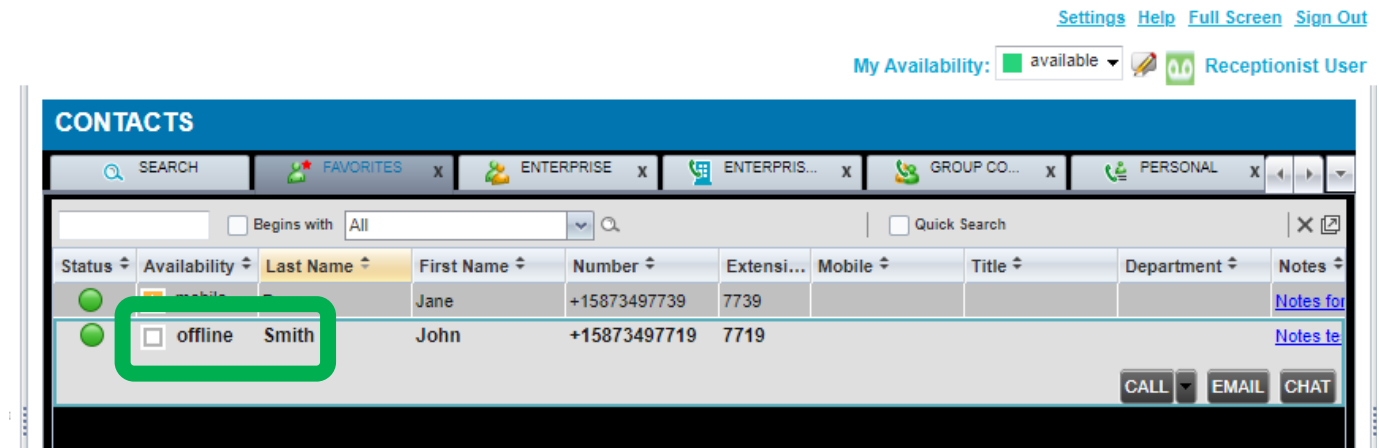

The SmartVoice Collaborative users will then be notified within the SmartVoice Collaborative UC-One App to Accept or Decline Availability sharing request. If the request is accepted, the receptionist will be able to see the user’s presence in the UC-One Receptionist Console.

SmartVoice Collaborative UC-One App

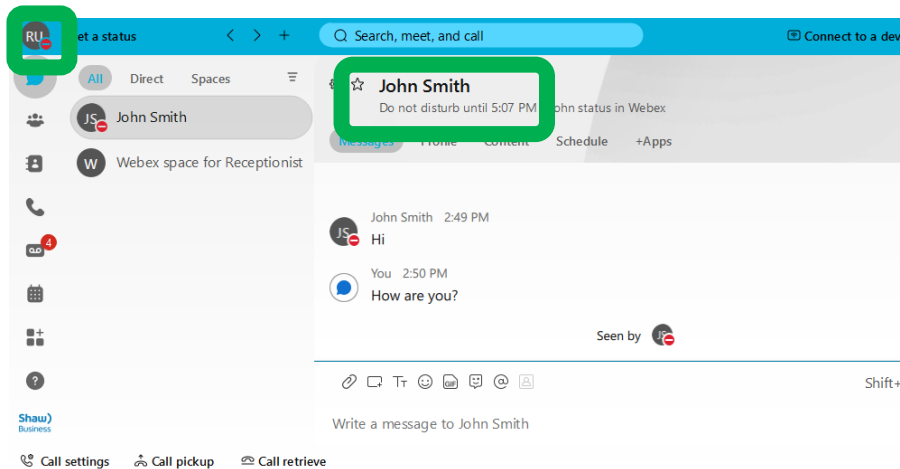

Once the SmartVoice Collaborative UC-One user migrates to Webex the Receptionist is no longer able to see their Availability in the console and they appear offline.

UC-One Receptionist Console

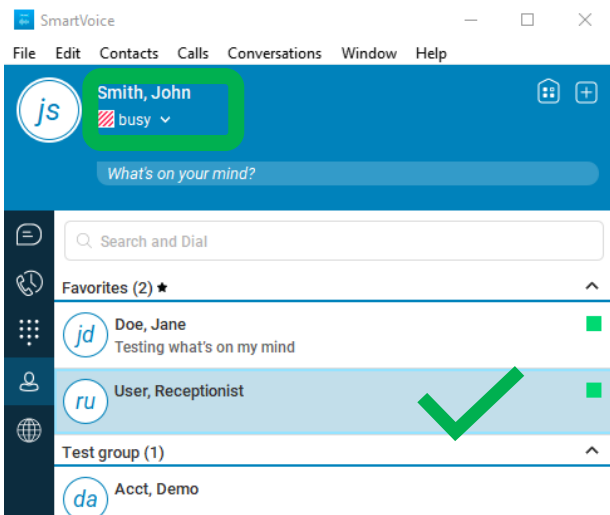

Once again, the UC-One Receptionist Console user can simply open their Webex app, search for the contact to see their Presence and Availability. In this scenario John Smith appears to be "Do Not Disturb".

AVAILABILITY SHARING

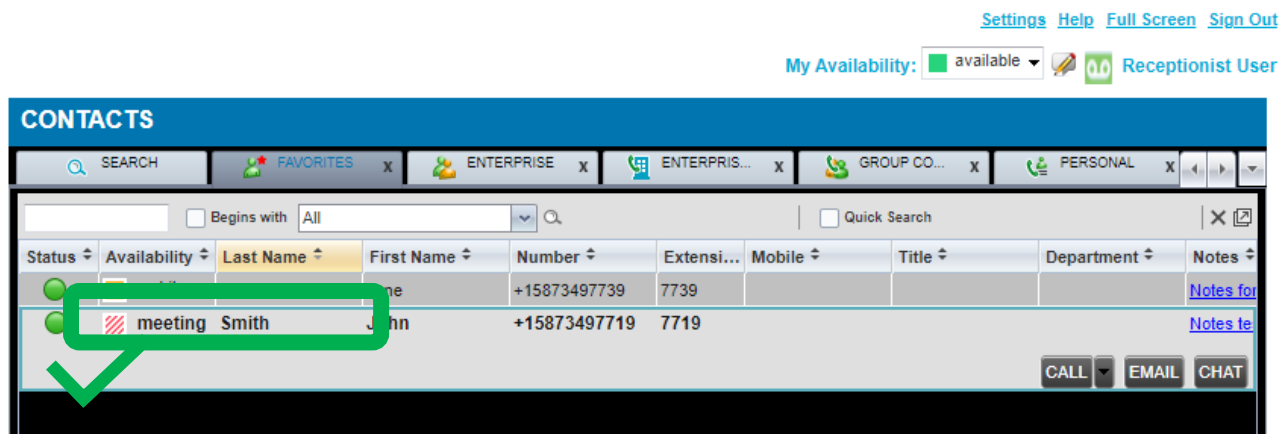

The SmartVoice Collaborative UC-One app user can also share their availability status with the Receptionist such as Meeting, Do Not Disturb, Available, In a Call etc. However, your SmartVoice Collaborative UC-One app must have a subscription to share availability with other users.

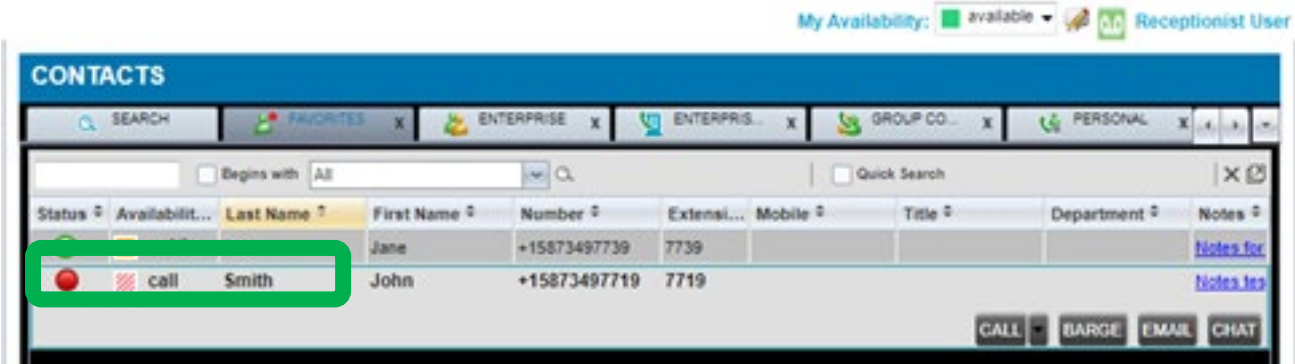

SmartVoice Collaborative UC-One App

UC-One Receptionist Console

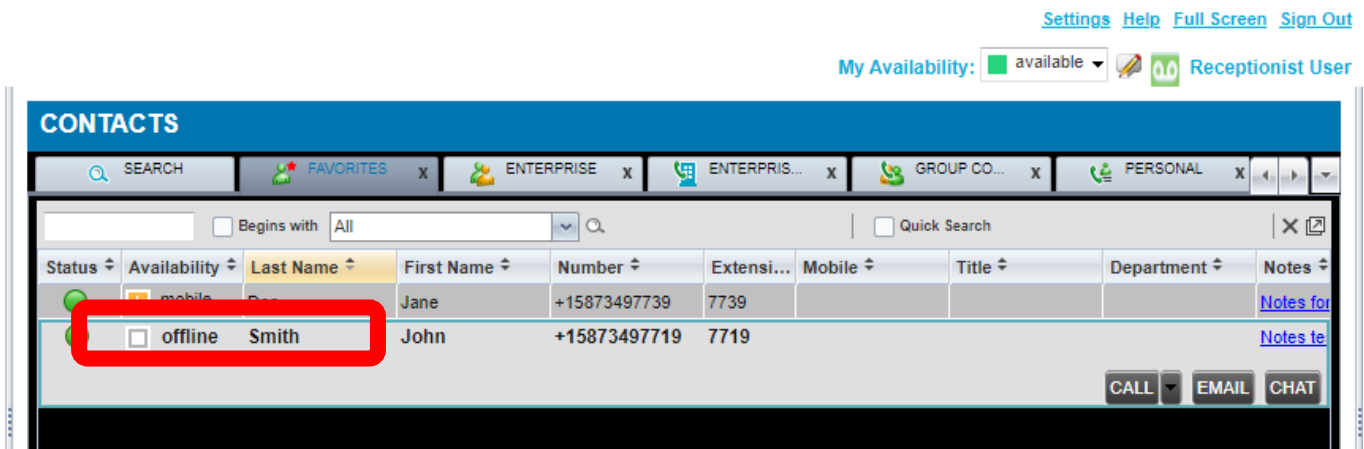

When a SmartVoice UC- One Collaborative user is busy, their status will reflect if they are in a meeting or a call.

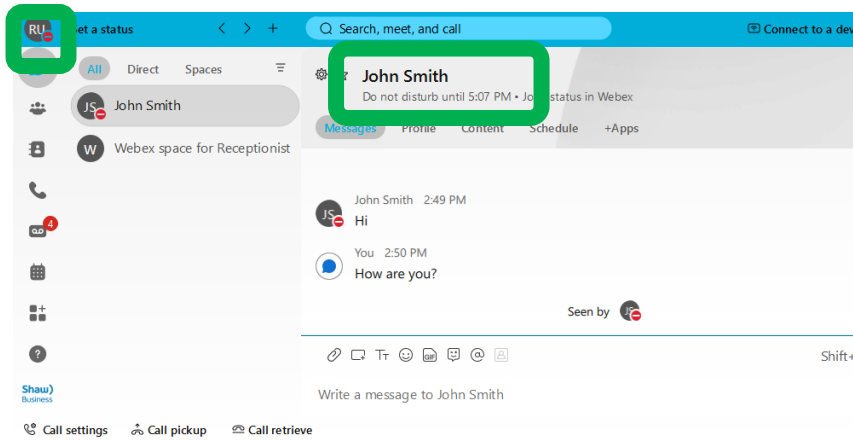

After the SmartVoice Collaborative UC-One user is migrated over to Webex, they will appear offline in the Receptionist console.

UC-One Receptionist Console

Receptionist Console user in Webex

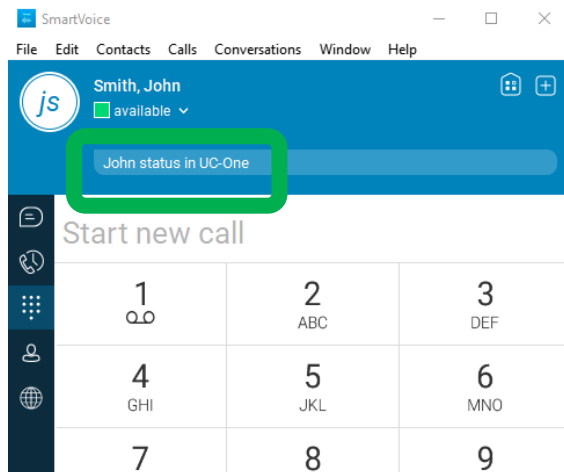

The Receptionist Console can then open their Webex app to see the presence of the user John Smith.

SHARING STATUS WITH THE RECEPTIONIST

The UC-One Receptionist Console user can view the current Status of the SmartVoice Collaborative App user as long as they have subscribed within the console.

SmartVoice Collaborative UC-One App

UC-One Receptionist Console

The SmartVoice Collaborative user's current status is visible to the Receptionist in the console.

The screenshot shows the 'Shaw Business Receptionist Console' interface. At the top right, there are links for 'Settings', 'Help', and 'Full Screen', and a 'My Availability' dropdown set to 'available'. The main area is split into two panels. The left panel, titled 'CALL CONSOLE', has an 'Enter Number' field and a 'Redial' button, with 'No items to show' below. Below that is a 'CONFERENCE CALL' section and a 'QUEUED CALLS' section. The right panel, titled 'CONTACTS', has a search bar and tabs for 'FAVORITES', 'ENTERPRISE', 'ENTERPRIS...', 'GROUP CO...', and 'PERSONAL'. It displays a table of contacts with columns for Status, Availability, Last Name, First Name, Number, Extensi..., Mobile, Title, and Department. Two contacts are listed: Jane Doe (mobile) and John Smith (available). A yellow tooltip over John Smith says 'John status in UC-One'. Action buttons for 'CALL' and 'EMAIL' are visible for the selected contact.

| Status | Availability | Last Name | First Name | Number | Extensi... | Mobile | Title | Department |
|--------|--------------|-----------|------------|--------------|------------|--------|-------|------------|
| ● | 📱 mobile | Doe | Jane | +15873497739 | 7739 | | | |
| ● | 🟢 available | Smith | John | +15873497719 | 7719 | | | |

Once the SmartVoice UC-One Collaborative User has migrated to Webex, the status is no longer available to the Receptionist and the migrated user appears offline.

This screenshot shows the same 'CONTACTS' panel as the previous one, but now John Smith's status is 'offline' (represented by a grey circle). The 'My Availability' dropdown is still 'available', but the user name is 'Receptionist User'. The table now shows Jane Doe (mobile) and John Smith (offline). Action buttons for 'CALL', 'EMAIL', and 'CHAT' are visible for the selected contact.

| Status | Availability | Last Name | First Name | Number | Extensi... | Mobile | Title | Department | Notes |
|--------|--------------|-----------|------------|--------------|------------|--------|-------|------------|-----------|
| ● | 📱 mobile | Doe | Jane | +15873497739 | 7739 | | | | Notes for |
| ● | ⚪ offline | Smith | John | +15873497719 | 7719 | | | | Notes te |

UC-One Receptionist Console

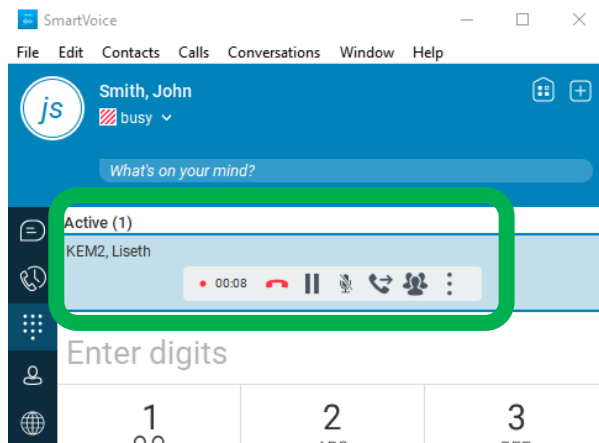

The SmartVoice Collaborate UC-One user can share their current “Status” with the UC-One Receptionist Console user.

Once the SmartVoice Collaborate UC-One user is migrated to Webex they will appear “Offline” in the Receptionist Console.

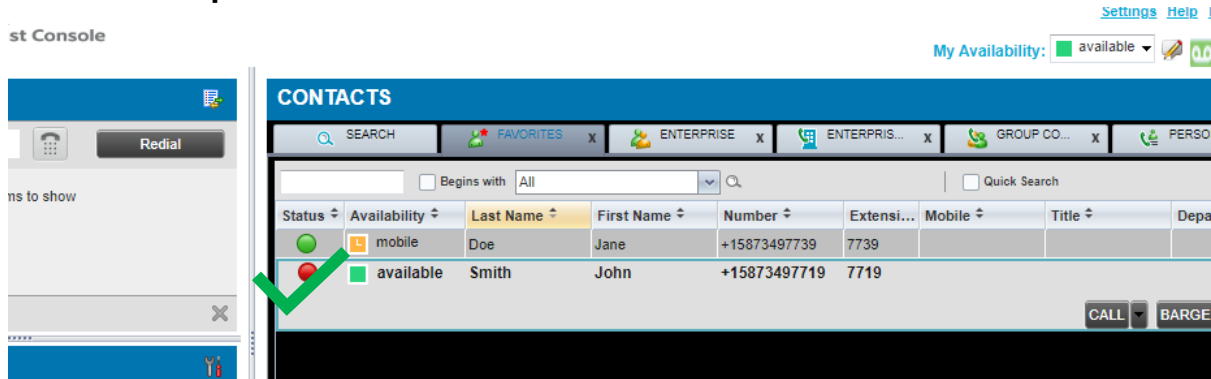

TELEPHONY STATUS

The Telephony status indicates whether the SmartVoice Collaborative UC-One User is Available or Busy on Attending a Call.

SmartVoice Collaborative UC-One App

UC-One Receptionist Console

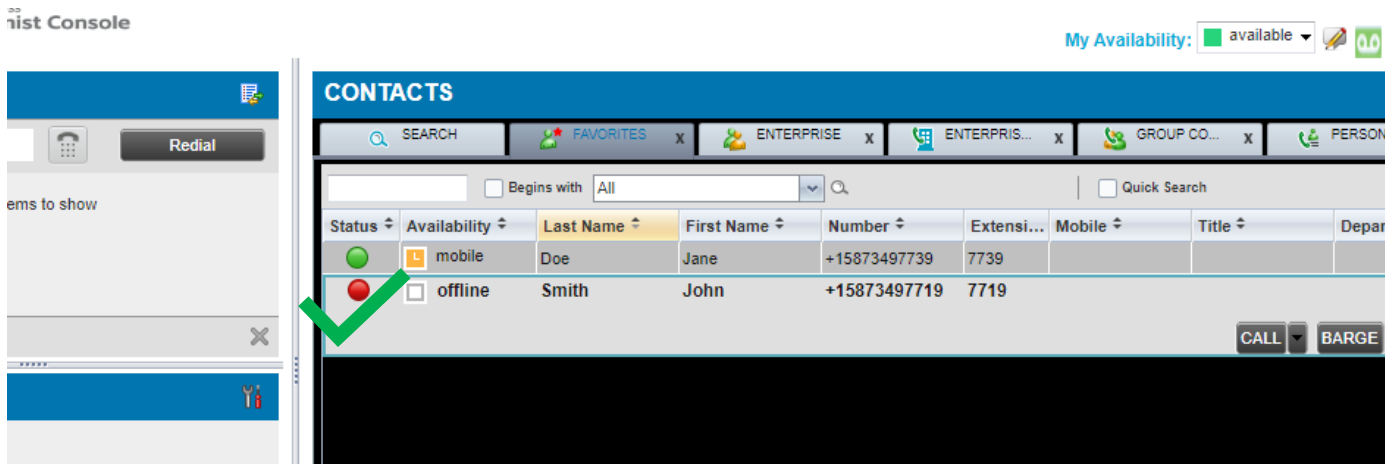

This feature is not impacted even after a SmartVoice Collaborative UC-One User is migrated to SmartVoice with Webex and their Telephony Presence will be visible under “Status” in the Receptionist Console.

Webex

John Smith is on a call with user 310-1010 and as such their status in the console appears red.
