Grow your Business with SmartSecurity.

SmartSecurity is a robust network security solution built for small businesses that has typically been reserved for large scale enterprise organizations. Help protect against the latest network threats while managing access to your network and what type of content can be viewed.

Let SmartSecurity do the heavy lifting for your network security, so you can focus on your business.

Cloud management across your networks

- Manage your network from anywhere* using an intuitive online dashboard.
- Receive seamless, automatic over-the-web feature upgrades and security policy updates.

Choose who and what is allowed on your network

- Set network policies for your employees and your customers, and choose which users, devices and applications can send and receive data.
- Allow, limit or deny access to specific types of internet content (e.g. video & music, gaming, social media etc).

Proactively protect your business from threats

- Choose what's allowed to enter your network with the business grade firewall.
- Track and help protect against the latest threats with malware updates that are automatically pushed.

Secure multiple locations of your business

- Your data is kept safe and malicious attacks are diminished with real-time traffic analysis that monitors remote locations.
- A Virtual Private Network (VPN) provides a secure connection between offices and allows remote employees to access business files safely.

We'll manage everything for you.

Think of us as a complement to your IT department. Our highly trained team is with you every step of the way.
