

Your network, on your terms.

SmartSecurity keeps your network safe from threats while you easily manage access.

It's all in the cloud, no silver lining needed

- · Get moving. Manage your network from anywhere* using an intuitive online dashboard.
- Sit back and receive seamless, automatic over-the-web feature upgrades and security policy updates.

Get picky about your network access

- Set network policies for your employees and your customers, and choose which users, devices and applications can send and receive data.
- Allow, limit or deny access to specific types of Internet content (e.g. video & music, gaming, social media etc). You're the boss.

Stay ahead of threats. Way ahead.

- Next-generation protection to take on next-generation threats. SmartSecurity uses global threat intelligence to detect, contain, and prevent network breaches in real-time.
- Track and help protect against the latest threats with malware updates that are automatically pushed.

Multiple locations, one serious security protocol

- A Virtual Private Network (VPN) provides secure connection between offices and allows remote employees to access business files safely.
- Rest easy Your data is kept safe and malicious attacks are diminished with real-time traffic analysis that monitors remote locations.

Visit: business.shaw.ca/Internet/SmartSecurity

SmartSecurity features include:

Cloud managed

Access a comprehensive dashboard to view and manage your network from anywhere^{*} at anytime.

Application control

Set network policies for employees and guests by choosing which specific applications are permitted to access your system.

Content filtering

Choose what types of web content are permitted or denied within your network (e.g. gambling, adult content).

Safeguard remote workers

Provide a secure VPN connection for your remote workers to access business files.

View application and website usage so you can choose what's allowed on your network.

Business-grade firewall

Ensure only the network traffic you want enters or leaves.

Advanced Threat protection

Help protect your business against the latest viruses, malware and malicious hackers.

Secure multiple locations

Connect multiple offices together and share files safely through a secure Virtual Private Network (VPN).

Security reporting provides visibility into threat activity so you can make proactive decisions for network policies and usage allowances.

Additional Features: (For more details, chat with your Business Sales Consultant)

LTE Backup Plus

Defend against downtime with a backup Internet connection that ensures seamless and automatic failover in case of an outage.

Shaw Business Internet or SmartWiFi is a required service to have SmartSecurity. An Internet or WiFi connection is needed to use certain SmartSecurity product features.
