### **Cyber Protect**

# SAFEGUARD YOU BUSINESS FROM CYBER THREATS.

#### **A SECURE BUSINESS IS A SUCCESSFUL BUSINESS.**

21% of businesses face cyber security incidents<sup>\*</sup>. Cyber Protect is your first line of defense against cyber threats to your network and employee devices.<sup>†</sup>

- Protect your network with DNS Security. Powered by Cisco's Al-driven threat-detection platform, your data is shielded from malware, phishing, ransomware and bot attacks hidden in malicious websites across the globe.
- Protect your devices with McAfee Multi Access. Whether you're on the network
  or away from the office, connect with confidence using McAfee's premium safe
  browsing and anti-virus software. We have you covered with licenses to deploy
  on any 10 devices running on Windows, MacOS, iOS or Android.

#### **SMART AND SIMPLE CYBER SECURITY.**

- DNS Security without lifting a finger. Our cloud-managed solution provides peace of mind with no hardware to deploy or software to update.
- Device protection that you control. Install on any 10 devices and we've got you covered with automatic updates from McAfee.
