

An all-in-one security solution that has your back.

Advantage Surveillance

Advantage Surveillance gives you access to cloud-based security cameras, professionally installed with secure encryption.

Key Benefits

Security, meet flexibility

Professionally installed HD cameras that are encrypted and work without additional software or expensive servers.

Advantage Surveillance fits to your business. You can adjust footage quality and recording settings as your needs change.

Stay ahead of threats. Way ahead

Manage your cameras and settings from anywhere¹ using an intuitive online dashboard—the same one that's used to manage Advantage WiFi and Advantage Security services.

Seamless cloud software updates are automatically pushed to your connected Advantage Surveillance cameras.

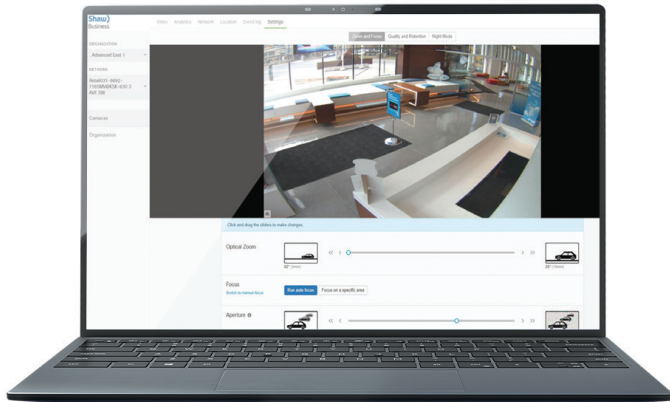

Deeper insights

Motion heat mapping and people-counting technologies allow you to optimize your merchandising and business strategies based on activity patterns inside your business.

Motion Search lets you quickly hone in on a particular area of interest and glean activity within that area, saving you time from reviewing lengthy footage.

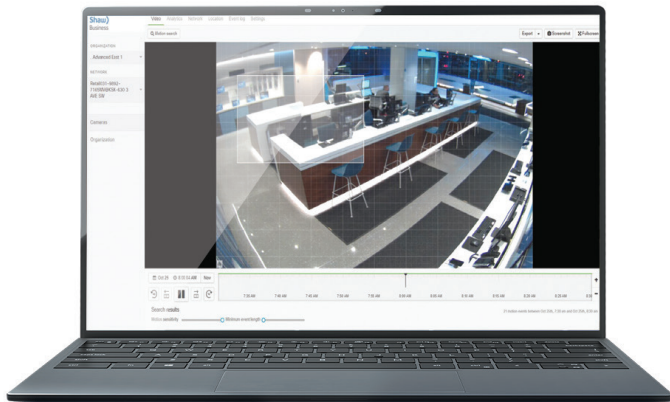

The all-in-one portal

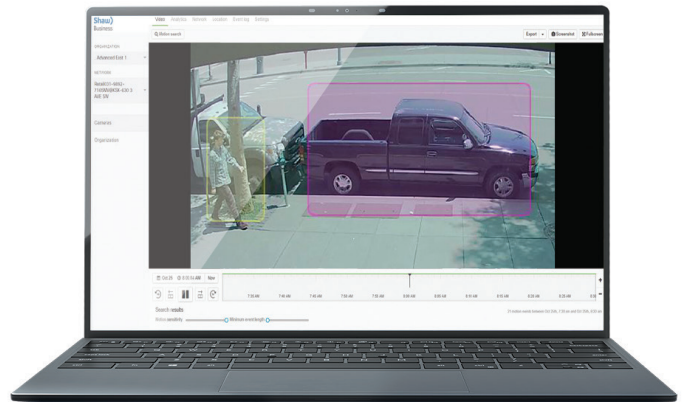

Easily view streaming video and create video walls for monitoring key areas of your business.

Motion heat mapping allows you to see activity patterns in your business over time.

Motion Search within a specified timeframe allows you to zoom in to see activity in the area of your choice.

Object Detection allows you to narrow down your search to detect people and vehicles (bikes, cars and trucks) in the camera's field of view.

Business Internet or Advantage WiFi is a required service to have Advantage Security. An Internet or WiFi connection is needed to use certain Advantage Security product features.
