

ARCHES Curriculum

AWSOM's unique curriculum, ARCHES, features six threads longitudinally integrated into courses, clerkships, and electives throughout four years of instruction enhanced with a collaborative, whole-person approach to care. From observations in art galleries to experiences in the clinic and immersive simulation activities, AWSOM students are prepared to solve the health care problems of the 21st century.

The ARCHES curriculum is subject to change. This schematic reflects the required elements of Year 3 and Year 4. The sequence may vary.

“ARCHES is an innovative, integrated curriculum built around six curricular threads. From day one, students learn to care for patients as a whole person, and to care for themselves with the same intention. It's the education I wish I had.”

YERKO BERROCAL, MD, MHPE
