

Quantum Pixel+ Hotel Lock

Key Figures

Lifetime per unit: 10 years
Weight per unit: 3.4 kg
Production location: Montreal, Canada

Production standards

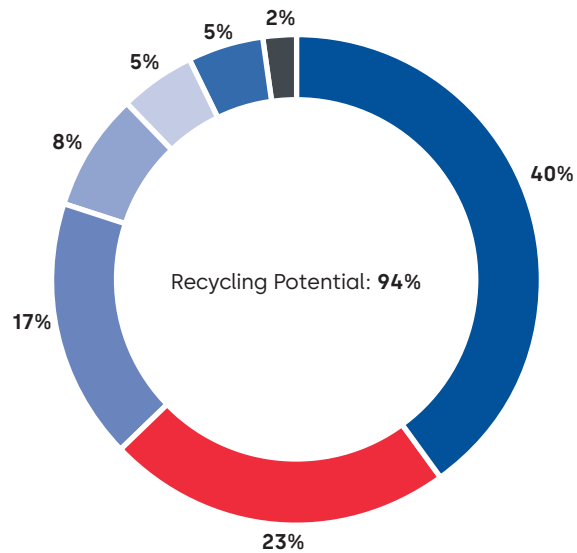

Quality	Environmental	Occupational Health & Safety	Energy	Produced with green electricity
ISO 9001 certified				✓

Product declarations / certifications

Environmental Product Declaration	Health Product Declaration	Building Product Declaration	Other
✓	✓		

Material used (%)

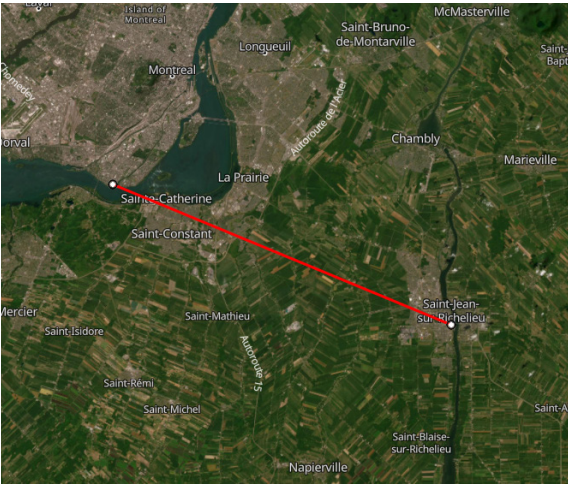

Steel Zinc Paper Stainless steel
Electronics Brass Plastics

¹ Carbon dioxide equivalent (CO₂e) is a standard unit of measurement used to express the climate impact of greenhouse gas emissions by converting them into the amount of carbon dioxide that would produce the same global warming effect, based on their global warming potential (GWP). It is widely used in product carbon footprint (PCF) calculations to compare and aggregate emissions of different greenhouse gases on a common basis.

The PCF¹ across the life cycle is 7 kg CO₂e

This is similar to the CO₂ produced from a road trip with a diesel mid-range car from Montreal to Saint-Jean-sur-Richelieu (≈ 41 km).
