## Confirmation of Compliance with EU Regulation 2011/65/EU (RoHS)

Dear Sir or Madam,

thanks a lot for your inquiry regarding safe-use and environmental aspects of our products.

We are committed to fostering a sustainable development along our entire value chain in line with our economic, environmental and social responsibilities toward current and future generations. We seek an open, transparent dialogue with all stakeholders to define strategies and actions based on clear targets and continuous improvement, and we actively report on our progress. If you wish to learn more about our sustainable goals and achievements, please follow the link: <https://www.dormakaba.com/us-en/about-us/sustainability/reporting-77258>

We are a premium manufacturer with high demands on the quality of our products. As customary in the industry, our products can be subject to separate approvals by testing authorities and other normative specifications, such as the European Construction Product Regulation 305/2011/EU. The respective documents, such as declarations of performance, building authority approvals or CE declarations of conformity, could be reviewed and downloaded from our dormakaba website, section "Products & Solutions".

Our MKS (Mechanical Key Systems) products do not fall under the scope of the above-mentioned directive 2011/65/EU and its enforced amendments, such as and in particular directive 2015/863/EU. Anyhow, after a thorough examination of the technical documentation and supplier information, we are pleased to inform that we currently have no indicator that the mentioned products infringe the aforementioned directives.

Yours faithfully

dormakaba Austria GmbH
