CLASSIFICATION: 08 71 00 Door Hardware

**PRODUCT DESCRIPTION:** The BEST hinges are intended for the use on heavy doors or doors where high frequency is expected such as entrance doors to office buildings, stores, public buildings and corridor entrance doors to offices. All hinges have a template screw hole location for the use on either wood or hollow metal doors and frames. They are equipped with four permanently lubricated non-detachable ball bearings. The pins in the non-ferrous hinges are stainless steel and the hole in bottom tip is for easy pin removal.

## Section 2: Content in Descending Order of Quantity

This section lists contents in a product based on specific threshold(s) and reports detailed health information including hazards. This HPD uses the inventory method indicated above, which is one of three possible methods:

- Basic Inventory method with Product-level threshold.
- Nested Material Inventory method with Product-level threshold
- Nested Material Inventory method with individual Material-level thresholds

Definitions and requirements for the three inventory methods and requirements for each data field can be found in the HPD Open Standard version 2.3, available on the HPDC website at: [www.hpd-collaborative.org/hpd-2-3-standard](http://www.hpd-collaborative.org/hpd-2-3-standard)
