# **ENVIRONMENTAL PRODUCT DECLARATION**

as per ISO 14025 and EN 15804+A2

Owner of the Declaration	dormakaba International Holding GmbH
Programme holder	Institut Bauen und Umwelt e.V. (IBU)
Publisher	Institut Bauen und Umwelt e.V. (IBU)
Declaration number	EPD-DOR-20210304-CBA1-EN
Issue date	04.05.2022
Valid to	03.05.2027

# BEST 1C Series dormakaba

www.ibu-epd.com | https://epd-online.com

# dormakaba

# **General Information**

# dormakaba

#### Programme holder

IBU - Institut Bauen und Umwelt e.V. Panoramastr. 1 10178 Berlin Germanv

#### **Declaration number** EPD-DOR-20210304-CBA1-EN

This declaration is based on the product category rules: Building Hardware products, 11.2017 (PCR checked and approved by the SVR)

# **Issue date**

04.05.2022

# Valid to

03.05.2027

Man liten

Dipl. Ing. Hans Peters (chairman of Institut Bauen und Umwelt e.V.)

Manuel Wals

Dr. Alexander Röder (Managing Director Institut Bauen und Umwelt e.V.))

# Product

# **Product description/Product definition**

BEST Cores draw on the legacy of quality and expertise that keep our products on the forefront of the industry. Brass alloy construction result in reliable performance over time. BEST Cores allow for easier rekeying by allow a user to remove the core from the lock without the need to remove the lever.

For the use and application of the product the respective national provisions at the place of use apply. The standards which can be applied are the following:

- ANSI/BHMA 156.5
- BAA/TAA
- UL listed

# Application

BEST Cores are designed for commercial and institutional applications, where seamless removal of the core from its hardware is needed.

# **Technical Data**

The cores have following technical properties:

# **BEST 1C Series**

#### Owner of the declaration

dormakaba International Holding GmbH **DORMA Platz 1** 58256 Ennepetal Germany

# Declared product / declared unit

1 core (1 piece) of the BEST 1C Series.

# Scope:

This Environmental Product Declaration refers to a specific core manufactured by dormakaba. The production site is located in Indianapolis (USA).

The data represents the year 2020.

The owner of the declaration shall be liable for the underlying information and evidence; the IBU shall not be liable with respect to manufacturer information, life cycle assessment data and evidences.

The EPD was created according to the specifications of EN 15804+A2. In the following, the standard will be simplified as EN 15804.

#### Verification

The standard EN 15804 serves as the core PCR

Independent verification of the declaration and data according to ISO 14025:2010

internally externally

Dr.-Ing. Wolfram Trinius (Independent verifier)

# dormakaba 🚧

General	
BHMA Standard	BEST - SFIC
Product Specifications	A156.5, Grade 1
Utility Patent	2027
Physical:	
Core Material	Brass
Key Material	Nickel-Silver
8 Finishes	605, 606, 611, 612, 613, 625, 626, 690
Core Size (pin count)	6 or 7
Keyway Count (excluding multi-milling)*	> 30
Key System	A2, A4
Security Levels: **	
(W) Non-exclusive	Available
(X) Two-digit zip code exclusive	Available
(Y) One-digit zip code exclusive	Available
(Z) National exclusive	Available
Features:	
Warranty	3 year limited
Pick & Drill Resistant	Option
Key Trap	Option
Wear Resistant	Option
M series keys are backward compatible with standard J,K,L,M keyways	MJ,MK,ML,MM
Milling (sectional keyways) Capability	Double, Quad
Construction Core to Permanent Keying Support	Yes
Keystone - Key and Core Control Management***	Service Option
BESTCode - Masterkey System Support	Service Option
Custom Key Stamping ***	Service Option

Performance data of the product with respect to its characteristics in accordance with the relevant

# LCA: Calculation rules

#### **Declared Unit**

The declared unit is 1 piece of the product: BEST 1C Series.

#### **Declared unit**

Name	Value	Unit
Declared unit	1	piece/prod uct
Mass of declared Product	0.0449	kg

# System boundary

The type of EPD is: cradle to gate with options, modules C1–C4, and module D (A1-A3 + C + D and additional modules: A4 + A5)

# **Production - Module A1-A3**

The product stage includes: — A1, raw material extraction, processing and mechanical treatments, processing of secondary material input (e.g. recycling processes), — A2, transport to the manufacturer, — A3, manufacturing and assembly

including provision of all materials, products and energy, as well as waste processing up to the end-of waste state.

# **Construction stage - Modules A4-A5**

The construction process stage includes:

technical provision which can be applied are mentioned above.

# **Base materials/Ancillary materials**

Name	Value	Unit
Brass	93	%
Steel	3	%
Paper	2	%
Others	>1	%

The product/s include/s partial articles which contain substances listed in the Candidate List of *REACH* Regulation 1907/2006/EC (date: 17.01.2022) exceeding 0.1 percentage by mass: yes

 Lead (Pb): 7439-92-1 (CAS-No.) is included in some of the alloys used. The concentration of lead in each individual alloy does not exceed 4.0% (by mass).

The *Candidate List* can be found on the *ECHA* website address: https://echa.europa.eu/de/home.

# **Reference service life**

The reference service life of the BEST 1C Series cores depend on the traffic pattern and degree of usage of the core. The BEST 1C Series is certified to *BHMA/ANSI Grade 1*, meaning they are designed to whithstand a minimum of 40,000 uses.

 A4, transport to the building site;
 A5, installation into the building;
 including provision of all materials, products and energy, as well as waste processing up to the end-of waste state or disposal of final residues during the construction process stage.

# End-of-life stage- Modules C1-C4 and D

The end-of-life stage includes:

- C1, de-construction, demolition:
- C2, transport to waste processing;

- C3, waste processing for reuse, recovery and/or recycling;

C4, disposal;

including provision and all transport, provision of all materials, products and related energy and water use. Module D (Benefits and loads beyond the system boundary) includes:

 D, recycling potentials, expressed as net impacts and benefits.

# Comparability

Basically, a comparison or an evaluation of EPD data is only possible if all the data sets to be compared were created according to *EN 15804* and the building context, respectively the product-specific characteristics of performance, are taken into account.

Background database: GaBi, SP40.

# dormakaba

# LCA: Scenarios and additional technical information

#### **Characteristic product properties** Information on biogenic Carbon

#### Information on describing the biogenic Carbon ate

Content	at	factory	g

Name	Value	Unit
Biogenic Carbon Content in	0	kg C
accompanying packaging	0	Ng O

Additional technical information for the declared modules.

# Transport to the building site (A4)

Name	Value	Unit
Litres of fuel per 1 kg (truck)	0.00276	l/100km
Transport distance truck	1500	km
Capacity utilisation (including empty runs) average	55	%
Transport distance (ship)	10000	km

# Installation into the building (A5)

Name	Value	Unit
Output substances following waste treatment on site (packaging)	0.0011	kg

# End of life (C1-C4)

C1: The product dismantling from the building is done manually without environmental burden.

C2: Transport to waste treatment at end of life is 50km. Name Value Unit

Name	Value	Onit
Collected separately	0.0438	kg
Recycling	0.0438	kg

#### Reuse, recovery and/or recycling potentials (D), relevant scenario information

Name Value Unit Collection rate is 100%.

	RESULTS OF THE LCA – additional impact categories according to EN 15804+A2-optional:										
1 core	Core										
Indicator	Unit	A1-A3	A4	A5	B6	C1	C2	C3	C4	D	
PM	[Disease Incidence]	7.66E-9	9.54E-10	2.42E-12	0.00E+0	0.00E+0	9.63E-13	0.00E+0	0.00E+0	3.09E-10	
IRP	[kBq U235- Eq.]	3.80E-2	1.51E-5	4.01E-6	0.00E+0	0.00E+0	3.99E-7	0.00E+0	0.00E+0	-8.56E-5	
ETP-fw	[CTUe]	1.78E+0	6.90E-2	2.34E-4	0.00E+0	0.00E+0	2.00E-3	0.00E+0	0.00E+0	4.10E-2	
HTP-c	[CTUh]	1.90E-10	1.30E-12	1.24E-14	0.00E+0	0.00E+0	3.46E-14	0.00E+0	0.00E+0	7.09E-13	
HTP-nc	[CTUh]	2.95E-9	5.68E-11	5.36E-13	0.00E+0	0.00E+0	1.48E-12	0.00E+0	0.00E+0	2.17E-10	
SQP	[-]	9.00E-1	2.53E-4	1.31E-4	0.00E+0	0.00E+0	6.67E-6	0.00E+0	0.00E+0	2.30E-2	
P	PM = Potentia	al incidence o	f disease due	to PM emission	ons; IR = Pote	ntial Human e	exposure effici	ency relative t	o U235; ETP-	fw = Potential	
Caption	comparat						Jnit for humar ຊP = Potential			Potential	

Disclaimer 1 – for the indicator "Potential Human exposure efficiency relative to U235". This impact category deals mainly with the eventual impact of low dose ionizing radiation on human health of the nuclear fuel cycle. It does not consider effects due to possible nuclear accidents, occupational exposure nor due to radioactive waste disposal in underground facilities. Potential ionizing radiation from the soil, from radon and from some construction materials is also not measured by this indicator.

Disclaimer 2 – for the indicators "abiotic depletion potential for non-fossil resources", "abiotic depletion potential for fossil resources", "water (user) deprivation potential, deprivation-weighted water consumption", "potential comparative toxic unit for ecosystems", "potential comparative toxic unit for humans – cancerogenic", "Potential comparative toxic unit for humans - not cancerogenic", "potential soil quality index". The results of this environmental impact indicator shall be used with care as the uncertainties on these results are high or as there is limited experienced with the indicator.
