General Information

dormakaba	Concealed Door Closer ITS 96 EN 2-4								
Programme holder IBU – Institut Bauen und Umwelt e.V. Hegelplatz 1 10117 Berlin Germany	Owner of the declaration dormakaba International Holding GmbH DORMA Platz 1 58256 Ennepetal Germany								
Declaration number EPD-DOR-20240566-CB11-EN	Declared product / declared unit 1 piece of the product: Concealed Door Closer ITS 96, consisting of the following items: • Concealed Door Closer ITS 96 EN 2-4 • Product Packaging								
This declaration is based on the product category rules: Building Hardware products, 01.08.2021 (PCR checked and approved by the SVR)	Scope: This Environment Product Declaration refers to a specific door closer manufactured by dormakaba. The production site is located in Ennepetal (Germany). Green electricity with Guarantee of Origin (GoO) is being used at this production site. The data represents the year 2024. The owner of the declaration shall be liable for the underlying information and evidence; the IBU shall not be liable with respect to manufacturer information, life cycle assessment data and evidences. The EPD was created according to the specifications of EN 15804+A2. In the following, the standard will be simplified as <i>EN 15804</i> .								
Issue date 21.01.2025	Verification <table><tr><td colspan="2">The standard EN 15804 serves as the core PCR</td></tr><tr><td colspan="2">Independent verification of the declaration and data according to ISO 14025:2011</td></tr><tr><td>☐</td><td>internally</td></tr><tr><td>☒</td><td>externally</td></tr></table>	The standard EN 15804 serves as the core PCR		Independent verification of the declaration and data according to ISO 14025:2011		☐	internally	☒	externally
The standard EN 15804 serves as the core PCR									
Independent verification of the declaration and data according to ISO 14025:2011									
☐	internally								
☒	externally								
Valid to 20.01.2030

Product

Product description/Product definition

The integrated ITS 96 slide channel door closer system is a modular and multifunctional system comprising only with a few door closer models and various slide channels which complies with many functional requirements. The dormakaba ITS 96 door closer is designed for concealed installation in the door leaf and frame. Suitable for almost every type of door, it offers a wide variety of functions and flexibility combined with a high level of quality. Because of its compact design, the ITS 96 system can be concealed for virtual invisibility within the door and frame, integrating inconspicuously with the overall architectural ambience.

With the new integrated door closer ITS 96 EN 2-4, doors cannot be thrown open in an uncontrolled manner, which offers effective protection against damage and accidents. For the integrated door closer ITS 96 the standards which can be applied are the following:

- EN 1154
- EN 1634-1
- EN 1155
- EN 1158
- ANSI 156.4

The CE-marking takes into account the proof of conformity with the respective harmonized standards based on the legal provisions above.

Application

The ITS 96 can be used for fire and smoke control doors, as well as on standard doors. The functions of the ITS 96 can be individually adapted to the local conditions of each application. The closing strength can be easily varied in accordance with the door width via the adjustment screw accessible from the top. The closing speed, the latch action and the backcheck can likewise be modified at any time using adjustment screws at the top, even after the door has been hung.

Technical Data

The door closer ITS 96 EN 2-4 has following technical properties:

Name	Value	Unit
Standard doors	up to 1100	mm
Fire and smoke check doors	up to 1100	mm
Door leaf thickness	up to 50	mm
Max. door leaf weight	130	kg
Max. door opening angle	approx 120	°

LCA: Calculation rules

Declared Unit

The declared unit is 1 piece of the product: Integrated door closer ITS 96 EN 2-4 including packaging.

Name	Value	Unit
Declared unit	1	piece/product
Mass of declared Product without Packaging	1.95	kg
Mass of Packaging	0.06	kg

System boundary

The type of EPD is: cradle to gate with options, modules C1–C4, and module D (A1–A3 + C + D and additional modules: A4

Product not harmonised in accordance with the Constructions Product Regulation (CPR) but in accordance with other provisions for harmonisation of the EU: Performance data of the product with respect to its characteristics in accordance with the relevant technical provision which can be applied are mentioned above.

Base materials/Ancillary materials

The major material composition including the packaging of the product is listed below:

Name	Value	Unit
Steel	89	%
Others	4	%
Packaging	3	%
Zinc	2	%
Aluminium	1	%
Plastics	1	%

The product/s include/s partial articles which contain substances listed in the Candidate List of REACH Regulation 1907/2006/EC (date: 07.11.2024) exceeding 0.1 percentage by mass: yes

- Lead (Pb): 7439-92-1 (CAS-No.) is included in some of the alloys used. The concentration of lead in each individual alloy does not exceed 4.0% (by mass).

The *Candidate List* can be found on the *ECHA* website address: <https://echa.europa.eu/de/home>.

Reference service life

The reference service life for the integrated door closer ITS 96 EN 2-4 is about 20 years, depending on the application and frequency of use. For repairs and renewals, suitable spare parts are available. The door closer is tested and certified to EN 1154, meaning they are designed to withstand a minimum of 500.000 cycles.

+ A5)

Production - Module A1-A3

The product stage includes:

- A1, raw material extraction, processing and mechanical treatments, processing of secondary material input (e.g. recycling processes),
- A2, transport to the manufacturer,
- A3, manufacturing and assembly including provision of all materials, products and energy, green electricity with Guarantee of Origin (GoO), as well as waste processing up to the end-of waste state.

Construction stage - Modules A4-A5

The construction process stage includes:

- A4, transport to the building site;
- A5, installation into the building; including provision of all materials, products and energy, as well as waste processing up to the end-of waste state or disposal of final residues during the construction process stage.

End-of-life stage— Modules C1-C4 and D

The end-of-life stage includes:

- C1, de-construction, demolition;
 - C2, transport to waste processing;
 - C3, waste processing for reuse, recovery and/or recycling;
 - C4, disposal; including provision and all transport, provision of all materials, products and related energy and water use.
- Module D (Benefits and loads beyond the system boundary)

includes:

- D, recycling potentials, expressed as net impacts and benefits.

Geographic Representativeness

Land or region, in which the declared product system is manufactured, used or handled at the end of the product's lifespan: Global

Comparability

Basically, a comparison or an evaluation of EPD data is only possible if all the data sets to be compared were created according to *EN 15804* and the building context, respectively the product-specific characteristics of performance, are taken into account. Background database: GaBi, SP40.

LCA: Scenarios and additional technical information

Characteristic product properties of biogenic carbon

Name	Value	Unit
Biogenic carbon content in product	-	kg C
Biogenic carbon content in accompanying packaging	0.03	kg C

Ennepetal (Germany) is considered for A3.

Note: 1 kg of biogenic carbon is equivalent to 44/12 kg of CO₂.

Transport to the building site (A4)

Name	Value	Unit
Litres of fuel truck (per piece)	0.00276	l/100km
Transport distance via truck	100	km
Transport distance via truck (from dormakaba logistic center to harbor)	300	km
Capacity utilisation (including empty runs) average	55	%
Transport distance via ship	11000	km

The product is transported via truck and ship. The product is stored in the dormakaba logistic center in Germany. The main distribution regions are Asia and the EU with the calculated transport distances. In order to allow scaling to a specific point of installation 100 km is declared as well.

Installation into the building (A5)

Name	Value	Unit
Waste packaging (paper and plastic)	0.060	kg

Reference service life

Name	Value	Unit
Life Span according to the manufacturer	20	a

End of life (C1-C4)

C1: The product dismantling from the building is done manually without environmental burden.

C2: Transport to waste treatment at end of life is 50 km.

Name	Value	Unit
Collected separately waste type	1.95	kg
Recycling	1.92	kg
Energy recovery	0.03	kg

The product is disassembled in a recycling process. Material recycling is then assumed for metals. The plastic components are assumed to be incinerated with energy recovery. Region for the End of Life is: Global.

Reuse, recovery and/or recycling potentials (D), relevant scenario information

Name	Value	Unit
Recycling	100	%

The collection rate is 100%.

PM = Potential incidence of disease due to PM emissions; IR = Potential Human exposure efficiency relative to U235; ETP-fw = Potential comparative Toxic Unit for ecosystems; HTP-c = Potential comparative Toxic Unit for humans (cancerogenic); HTP-nc = Potential comparative Toxic Unit for humans (not cancerogenic); SQP = Potential soil quality index

Disclaimer 1 – for the indicator “Potential Human exposure efficiency relative to U235”. This impact category deals mainly with the eventual impact of low-dose ionizing radiation on human health of the nuclear fuel cycle. It does not consider effects due to possible nuclear accidents, occupational exposure or radioactive waste disposal in underground facilities. Potential ionizing radiation from the soil, radon and from some construction materials is also not measured by this indicator.

Disclaimer 2 – for the indicators “abiotic depletion potential for non-fossil resources”, “abiotic depletion potential for fossil resources”, “water (user) deprivation potential, deprivation-weighted water consumption”, “potential comparative toxic unit for ecosystems”, “potential comparative toxic unit for humans – cancerogenic”, “Potential comparative toxic unit for humans – not cancerogenic”, “potential soil quality index”. The results of this environmental impact indicator shall be used with care as the uncertainties on these results are high as there is limited experience with the indicator.

This EPD was created using a software tool.
