¹ Carbon dioxide equivalent (CO₂e) is the universal unit of measurement to indicate the global warming potential (GWP) of each of the six greenhouse gases, expressed in terms of the GWP of one unit of carbon dioxide. It is used to evaluate releasing (or avoiding releasing) different greenhouse gases against a common basis.

The GWP¹ across the life cycle is 104 kg CO₂e

This is similar to the CO₂ produced from a road trip with a diesel mid-range car from Las Vegas to California

Description

PURE Sonos Framed Glass Wall Systems provide the transparency of glass combined with STC rating to enhance privacy. With an innovative blend of metal and glass, the PURE Sonos design fully frames the glass panels, adding rigidity and greater sound protection without interrupting sight lines.

Total Global Warming Potential per life cycle stage (kg CO₂e)
