Dr. Martina Bender
(Managing Director Institut Bauen und Umwelt e.V.)

BEST Precision 2000 Series

Owner of the declaration

dormakaba International Holding GmbH
DORMA Platz 1
58256 Ennepetal
Germany

Declared product / declared unit

1 exit device (1 piece) of the Precision 2000 Series.

Scope:

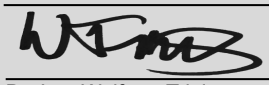

This Environmental Product Declaration refers to a specific exit device manufactured by dormakaba. The production site is located in Indianapolis (USA).

The data represents the year 2020.
The owner of the declaration shall be liable for the underlying information and evidence; the IBU shall not be liable with respect to manufacturer information, life cycle assessment data and evidences.

The EPD was created according to the specifications of EN 15804+A2. In the following, the standard will be simplified as *EN 15804*.

Verification

The standard EN 15804 serves as the core PCR
Independent verification of the declaration and data according to ISO 14025:2011
☐ internally ☒ externally

Dr.-Ing. Wolfram Trinius,
(Independent verifier)

Product

Product description/Product definition

No other exit device offers the level of functionality and dependability as this Grade 1, heavy-duty exit device. Built with fewer components and in various door configurations, the Precision 2000 provides smoother operation with minimal need for maintenance. The Precision 2000's durable construction allows it to withstand high traffic and high use on a regular basis, making it particularly attractive for healthcare and education buildings. These combined benefits give it a longer life span and a lower overall cost of ownership. For the use and application of the product the respective national provisions at the place of use apply. The standards which can be applied are the following:

- *ANSI/BHMA A156.3 Grade 1*
- *ANSI A117.1 Accessibility Code (ADA)* compliant
- *UL/cUL* listed
- *Florida Building Code* compliant for hurricanes
- *Miami-Dade County* compliant for hurricanes
- *California State Fire Marshal (California Title 24)* compliant
- *California State Fire Marshal* compliant for fire door
- *BAA and TAA* compliant
- *Illinois Accessibility Standard* compliant

Application

The Precision 2000 Series can be used for following building types:

- Learning and higher education
- Healthcare
- Government
- Retail and commercial
- Multifamily
- Hospitality

Technical Data

The exit device has following technical properties:

PRECISION APEX 2000 Specifications		
Certifications	BHMA A156.3 Grade 1 Listed ANSI A117.1 Accessibility Code (ADA) compliant UL/cUL 10C 3-hour Fire Listed UL/cUL 305 Listed Florida Building Code compliant for hurricanes Miami-Dade County compliant for hurricanes California State Fire Marshal (California Title 24) compliant	California State Fire Marshal compliant for fire door BAA and TAA compliant Illinois Accessibility Standard compliant MIL-STD 810G sections 509.6 Salt Spray, 521.3 Icing and Freezing Rain, 510.6 Blowing Dust Test
Materials	Exit device body: heavy-duty solid brass, bronze, aluminum and stainless steel Chassis: investment cast steel, zinc dichromated Chassis cover: stainless steel, brass or bronze Latchbolt: stainless steel, deadlocking, 3/4" throw	
Door Dimensions	Thickness: 1 3/4" – 2 1/4" standard Height: 6'8" – 10' (SVR) Width: 2' – 4' (application dependent)	
Strikes	5300: investment cast stainless steel, black powder coated 5988: optional strike for use on aluminum door applications 5458: optional strike for use on mullion applications	
Device Types	Wide Rim Narrow Rim Concealed Vertical Rod Narrow Stile Concealed Vertical Rod	Surface Vertical Rod Wood Door Concealed Vertical Rod Mortise
Electrified Options	C: Pre-Terminated Quick Connect Plug DE: Delayed Egress E: Electric Lock/Unlock ELR: Electric Latch Retraction MLR: Motorized Latch Retraction LS: Latchbolt Monitoring Switch Q: Wireless Access Management System	TS: Touchbar Monitoring Switch WTS: Weatherized Touchbar Switch ALK: Battery Powered Alarm ALW: Hardwired Alarm DS: Door Position Switch WALW: Weatherized Alarm
Trim and Lever Styles	Vandal Resistant Lever–no lever reset required Knob Trims Pull Trims A, B, C or D lever styles, standard 20 available decorative lever styles	
Finishes	605: Polished Brass, Clear Coated 606: Satin Brass, Clear Coated 612: Satin Bronze, Clear Coated 613: Dark Oxidized Satin Bronze 622: Powder Coated Black 625: Polished Chromium Plated	626W: Satin Chrome, Weatherized 628: Satin Aluminum, Clear Anodized 630: Satin Stainless Steel 690: Dark Bronze UltraShield™ antimicrobial coating available except 622 and 690 finishes.
Warranties	5-year mechanical	1-year electrical

Performance data of the product with respect to its characteristics in accordance with the relevant technical provision which can be applied are mentioned above.

Base materials/Ancillary materials

Name	Value	Unit
Stainless steel	43	%
Steel	30	%
Brass	14	%
Paper	6	%
Electronics	5	%
Zinc	2	%
Other	<1	%

The product/s include/s partial articles which contain substances listed in the Candidate List of *REACH* Regulation 1907/2006/EC (date: 17.01.2022) exceeding 0.1 percentage by mass: yes

- Lead (Pb): 7439-92-1 (CAS-No.) is included in some of the alloys used. The concentration of lead in each individual alloy does not exceed 4.0% (by mass).

The Candidate List can be found on the ECHA website address: https://echa.europa.eu/de/home.

Reference service life

The reference service life of the Precision 2000 Series exit device depends on the traffic pattern and degree of usage of the door. These exits are rated to *ANSI Grade 1*, meaning they are designed to withstand a minimum of 500,000 cycles. However, these exits have been independently tested to surpass 10,000,000 cycles.

LCA: Calculation rules

Declared Unit

The declared unit is 1 piece of the product: Precision 2000 Series.

Declared unit

Name	Value	Unit
Declared unit	1	piece/product
Mass of declared Product	12.04	kg

System boundary

The type of EPD is: cradle to gate with options, modules C1–C4, and module D (A1–A3 + C + D and additional modules: A4 + A5)

Production - Module A1-A3

The product stage includes:
— A1, raw material extraction, processing and mechanical treatments, processing of secondary material input (e.g. recycling processes), — A2, transport to the manufacturer, — A3, manufacturing and assembly including provision of all materials, products and energy, as well as waste processing up to the end-of waste state.

Construction stage - Modules A4-A5

The construction process stage includes:
— A4, transport to the building site;
— A5, installation into the building; including provision of all materials, products and energy, as well as waste processing up to the end-of waste state or disposal of final residues during the construction process stage.

End-of-life stage– Modules C1-C4 and D

The end-of-life stage includes:
— C1, de-construction, demolition:
— C2, transport to waste processing;
— C3, waste processing for reuse, recovery and/or recycling;
— C4, disposal;
including provision and all transport, provision of all materials, products and related energy and water use.

Module D (Benefits and loads beyond the system boundary) includes:
— D, recycling potentials, expressed as net impacts and benefits.

Geographic Representativeness

Land or region, in which the declared product system is manufactured, used or handled at the end of the product´s lifespan: United States

Comparability

Basically, a comparison or an evaluation of EPD data is only possible if all the data sets to be compared were created according to *EN 15804* and the building context, respectively the product-specific characteristics of performance, are taken into account.

LCA: Scenarios and additional technical information

Characteristic product properties of biogenic carbon

Information on describing the biogenic Carbon Content at factory gate

Name	Value	Unit
Biogenic carbon content in product	0.01	kg C
Biogenic carbon content in accompanying packaging	0.09	kg C

Note: 1 kg of biogenic carbon is equivalent to 44/12 kg of CO_2.

Additional technical information for the declared modules.

Transport to the building site (A4)

Name	Value	Unit
Litres of fuel per 1 kg (truck)	0.00276	l/100km
Transport distance (truck)	4300	km
Capacity utilisation (including empty runs) average	55	%
Transport distance (ship)	27000	km

Installation into the building (A5)

Name	Value	Unit
Output substances following waste treatment on site (packaging)	0.69	kg

Operational energy use (B6)

Name	Value	Unit
Electricity consumption for 1 year	62,41	kWh
Power consumpiton "on mode"	570	W
Hours per day in use "on mode"	0,3	h
Power consumption "standby mode"	0	W
Hours per day in use "standby mode"	23,7	h

End of life (C1-C4)

C1: The product dismantling from the building is done manually without environmental burden.
C2: Transport to waste treatment at end of life is 50km.

Name	Value	Unit
Collected separately waste type	11.3	kg
Recycling	10.7	kg
Energy recovery	0.012	kg
Final deposition	0,609	kg

Reuse, recovery and/or recycling potentials (D), relevant scenario information

Name	Value	Unit

Collection rate is 100%.

LCA: Results

Disclaimer:

EP-freshwater: This indicator has been calculated as 'kg P eq' as required in the characterization model (EUTREND model, Struijs et al., 2009b, as implemented in ReCiPe; http://eplca.jrc.ec.europa.eu/LCDN/developerEF.xhtml)

DESCRIPTION OF THE SYSTEM BOUNDARY (X = INCLUDED IN LCA; MND = MODULE OR INDICATOR NOT DECLARED; MNR = MODULE NOT RELEVANT)

PM = Potential incidence of disease due to PM emissions; IR = Potential Human exposure efficiency relative to U235; ETP-fw = Potential comparative Toxic Unit for ecosystems; HTP-c = Potential comparative Toxic Unit for humans (cancerogenic); HTP-nc = Potential comparative Toxic Unit for humans (not cancerogenic); SQP = Potential soil quality index

Disclaimer 1 – for the indicator “Potential Human exposure efficiency relative to U235”. This impact category deals mainly with the eventual impact of low-dose ionizing radiation on human health of the nuclear fuel cycle. It does not consider effects due to possible nuclear accidents, occupational exposure or radioactive waste disposal in underground facilities. Potential ionizing radiation from the soil, radon and from some construction materials is also not measured by this indicator.

Disclaimer 2 – for the indicators “abiotic depletion potential for non-fossil resources”, “abiotic depletion potential for fossil resources”, “water (user) deprivation potential, deprivation-weighted water consumption”, “potential comparative toxic unit for ecosystems”, “potential comparative toxic unit for humans – cancerogenic”, “Potential comparative toxic unit for humans - not cancerogenic”, “potential soil quality index”. The results of this environmental impact indicator shall be used with care as the uncertainties on these results are high as there is limited experience with the indicator.
