ES 200

Owner of the declaration

dormakaba International Holding GmbH
DORMA Platz 1
58256 Ennepetal
Germany

Declared product / declared unit

1 piece of the product: Automatic Sliding Door Operator ES 200, consisting of the following items:

- ES 200 Standard Sliding Door Operator
- Product packaging

Scope:

This Environmental Product Declaration refers to a specific sliding door operator ES 200 Standard manufactured by dormakaba. This EPD is also representative for the ES 200-2D, ES 200 EASY and ES 200 EASYplus. The production site is located in Ennepetal (Germany). Green electricity is being used at this production site.

Data represents the year 2022.

The owner of the declaration shall be liable for the underlying information and evidence; the IBU shall not be liable with respect to manufacturer information, life cycle assessment data and evidences.

The EPD was created according to the specifications of EN 15804+A2. In the following, the standard will be simplified as *EN 15804*.

Verification

The standard EN 15804 serves as the core PCR	
Independent verification of the declaration and data according to ISO 14025:2011	
<input type="checkbox"/>	internally
<input checked="" type="checkbox"/>	externally

Dr.-Ing. Wolfram Trinius,
(Independent verifier)

Product

Product description/Product definition

The automatic sliding door operator is a solution for any fields of application and scope of operation. The ES 200 allows dormakaba to supply a drive system that covers all applications due to its modular construction with a low number of components. The modular and flexible drive system is available in the following variants:

- ES 200 Standard
- ES 200 2D
- ES 200 EASY
- ES 200 EASYplus.

For the use and application of the product the respective national provisions at the place of use apply. For ES 200 the standards which can be applied are the following:

- EN 18650
- EN 16005
- EN 60335
- EN 61000
- ISO 13849
- Machinery Directive 2006/42/EC
- 2011/65/EU ROHS3 Directive

The CE marking takes into account the proof of conformity with the respective harmonized standards based on the legal provisions above.

Application

The automatic sliding door operator ES 200 is used as a drive for automating sliding door systems as well as escape and rescue routes. Applications are available for single- and double leaf doors.

Technical Data

The ES 200 has following technical properties:

Name	Value	Unit
Height maximum	150	mm
Installation depth	180	mm
Opening and closing force maximum	150	N
Opening speed maximum	70	cm/s
Closing speed maximum	50	cm/s
Hold open time maximum	180	s
Supply voltage, frequency maximum	60	Hz
Class of protection	20	IP

LCA: Calculation rules

Declared Unit

The declared unit is 1 piece of the product: ES 200

Name	Value	Unit
Declared unit	1	pce.
Mass of declared product	40,41	kg

System boundary

The type of EPD is: cradle to gate with options, modules C1–C4, and module D (A1–A3 + C + D and additional modules: A4 + A5 + B6)

Production - Module A1-A3

The product stage includes:

- A1, raw material extraction, processing and mechanical treatments, processing of secondary

Performance data of the product with respect to its characteristics in accordance with the relevant technical provision which can be applied are mentioned above.

Base materials/Ancillary materials

The major material composition including the packaging of the product is listed below:

Name	Value	Unit
Aluminium	41	%
Steel	26	%
Electronics	14	%
Paper	12	%
Plastic	7	%

The product includes partial articles which contain substances listed in the Candidate List of REACH Regulation 1907/2006/EC (date: 17.01.2023) exceeding 0.1 percentage by mass: yes

- Lead (Pb): 7439-92-1 (CAS-No) is included in the battery and some of the alloys used. The concentration in each individual alloy does not exceed 4.0% (by mass).

The Candidate List can be found on the ECHA website address: <https://echa.europa.eu/de/home>.

Reference service life

The reference service life for the ES 200 amounts to 10 years and depends on the application and frequency of use. For repairs and renewals, suitable spare parts are available. The sliding door operators are tested and certified EN 16005, meaning they are designed to withstand a minimum of 1.000.000 cycles.

material input (e.g. recycling processes),

- A2, transport to the manufacturer,
- A3, manufacturing and assembly including provision of all materials, products and energy, as well as waste processing up to the end-of waste state.

Construction stage - Modules A4-A5

The construction process stage includes:

- A4, transport to the building site;
 - A5, installation into the building;
- including provision of all materials, products and energy, as well as waste processing up to the end-of waste state or disposal of final residues during the construction process stage.

Use stage - Module B6

The use stage related to the operation of the building includes:

— B6, operational energy use

End-of-life stage– Modules C1-C4 and D

The end-of-life stage includes:

- C1, de-construction, demolition;
- C2, transport to waste processing;
- C3, waste processing for reuse, recovery and/or recycling;
- C4, disposal;

including provision and all transport, provision of all materials, products and related energy and water use.

Module D (Benefits and loads beyond the system boundary) includes:

- D, recycling potentials, expressed as net impacts

and benefits.

Geographic Representativeness

Land or region, in which the declared product system is manufactured, used or handled at the end of the product's lifespan: Germany

Comparability

Basically, a comparison or an evaluation of EPD data is only possible if all the data sets to be compared were created according to *EN 15804* and the building context, respectively the product-specific characteristics of performance, are taken into account. Background database: GaBi, SP40

LCA: Scenarios and additional technical information

Characteristic product properties biogenic carbon

The biogenic carbon content quantifies the amount of biogenic carbon in a construction product leaving the factory gate, and it shall be separately declared for the product and for any accompanying packaging.

If the total mass of biogenic carbon containing materials is less than 5 % of the total mass of the product and accompanying packaging, the declaration of biogenic carbon content may be omitted. The mass of packaging containing biogenic carbon shall always be declared.

Note: 1 kg of biogenic carbon is equivalent to 44/12 kg of CO₂.

Information on describing the Biogenic Carbon Content at factory gate

Name	Value	Unit
Biogenic carbon content in product	0.276	kg C
Biogenic carbon content in accompanying packaging	1.569	kg C

The following technical scenario information is required for the declared modules

Transport to the building site (A4)

Name	Value	Unit
Litres of fuel (per 1 kg)	0.00276	l/100km
Capacity utilisation (including empty runs)	55	%
Transport distance via medium truck	100	km

The product is transported via truck and ship. The product is stored in the dormakaba logistic center in Germany. The main distribution region is Europe.

In order to allow scaling to a specific point of installation 100 km are declared as well.

Installation into the building (A5)

Name	Value	Unit
Waste packaging (paper and plastic)	4,26	kg

Reference service life

Name	Value	Unit
Life Span according to the manufacturer	10	a

Operational energy use (B6)

Name	Value	Unit
Electricity consumption for 1 year	189.29	kWh
Days per year in use	365	days
Active state (hours/day)	1.8	h
Idle state (hours/day)	22.2	h
Electrical power active state	14.31	W
Electrical power idle state	22.2	W

End of life (C1-C4)

C1: The product dismantling from the building is done manually without environmental burden.

Name	Value	Unit
Collected separately	36.2	kg
Recycling	32.2	kg
Energy recovery	2.75	kg
Landfilling	1.17	kg
Transport to waste management	50	km

The product is disassembled in a recycling process. Material recycling is then assumed for the metals and electronics. The plastic components are assumed to be incinerated with energy recovery. Electromechanics and minor proportions of residues arising from the recycling process are landfilled. Region for the End of Life is: Global.

Reuse, recovery and/or recycling potentials (D), relevant scenario information

The collection rate is 100%.

SQP	SQP	1.23E+03	1.2E-02	5.06E-01	4.27E+03	0	5E-03	1.05E+00	1.73E-01	-5.8E+01

PM = Potential incidence of disease due to PM emissions; IR = Potential Human exposure efficiency relative to U235; ETP-fw = Potential comparative Toxic Unit for ecosystems; HTP-c = Potential comparative Toxic Unit for humans (cancerogenic); HTP-nc = Potential comparative Toxic Unit for humans (not cancerogenic); SQP = Potential soil quality index

Disclaimer 1 – for the indicator 'Potential Human exposure efficiency relative to U235'. This impact category deals mainly with the eventual impact of low-dose ionizing radiation on human health of the nuclear fuel cycle. It does not consider effects due to possible nuclear

accidents, occupational exposure or radioactive waste disposal in underground facilities. Potential ionizing radiation from the soil, radon and from some construction materials is also not measured by this indicator.

Disclaimer 2 – for the indicators 'abiotic depletion potential for non-fossil resources', 'abiotic depletion potential for fossil resources', 'water (user) deprivation potential, deprivation-weighted water consumption', 'potential comparative toxic unit for ecosystems', 'potential comparative toxic unit for humans –

cancerogenic', 'Potential comparative toxic unit for humans - not cancerogenic', 'potential soil quality index'. The results of this environmental impact indicator shall be used with care as the uncertainties on these results are high as there is limited experience with the indicator.

This EPD was created using a software tool.
