- **US :** Removed the Tazo Cafe Collective page and redirected it to home page.
- **US :** We have added the Bazaarvoice Carrousel to TAZO page here: <https://www.tazo.com/us/en/tea-latte-mix/>

TAZO Website Performance

DQM Scores - Silktide

Our objective is to attain and consistently uphold a Silktide score of 80 or higher across all Tazo markets. It's worth noting that we have been able to achieve and maintain an impressive score of approximately 90 for these markets. We have identified both global and specific concerns that are currently under active resolution, with some already successfully addressed.

Market	Overview - Previous Month	Overview - This Month	Content	Accessibility	Marketing	UX
US-EN	87	87	90	81	86	91
US_ES	91	91	91	82	94	97

In the month of April, we identified and resolved several issues, raising the Silktide score from 83 to 87. The following issues were resolved :

- Fixed seven broken links on the TAZO US-ES website.
- Fixed eleven broken links on the TAZO US-EN website.
- Corrected horizontal scrolling issue on 15 URLs for small phones (e.g., iPhone 5).

We are currently identifying additional underlying issues to further improve this score.

Core Web Vitals Assessment

We are adopting a proactive approach by monitoring identified pages daily to promptly identify and address any Core Web Vitals Metrics issues, including LCP, CLS, and INP. This regular monitoring helps us swiftly fix CWVs issues in the TAZO US market.

- Generating comprehensive reports for CWV Mobile Metrics utilizing the [PageSpeed Insights](#) API alongside the Screaming Frog tool.
- **Regular Monitoring:** A proactive approach is being adopted by monitoring the identified pages on a daily basis. This consistent monitoring allows for the prompt identification of any emerging the Core Web Vitals Metrics issues or performance degradation, enabling the development team to swiftly address and rectify the situation.

The importance of this initiative lies in enhancing user experience, boosting website performance, increasing user engagement, and achieving higher search engine rankings by ensuring faster loading times and better responsiveness.
