CUSTOM SOLUTIONS

THE GENERATING SET WITH THE HIGHEST POWER DENSITY. ONLY FROM KOHLER.

KOHLER® G-Drive diesel engines offer outstanding specific power in a clean, modular design. Our global team of engineers developed two sophisticated engine blocks—K135 and K175—that deliver a large range of power. **And the largest engine of the KD SERIES range, the KD103V20 is now ready to power your needs.**

Created specifically for generator set applications, these engines combine greater power with superior efficiency. Reaching up to 4000 kWe, KOHLER KD SERIES generating sets pair a compact form factor with unrivaled kW per displacement—delivering the highest power density on the market.

We deliver integrated industrial power systems for emergency, prime, and continuous applications worldwide—from mission critical applications like data centers, and hospitals to water treatment facilities, and government offices. With a deep understanding of your industry, we excel in designing customized power systems that simplify your most complex challenges.
