APPENDIX A

Conditions

Use and Access

The Respondent owner shall have the right to use the right of way for agricultural purposes, subject to the Operator's right to enter to exercise the rights granted by this Order;

Any land affected by this Order previously acquired by a Respondent named in this Order shall be held in common by the Operator and the said Respondent;

Following installation of the pipeline, other than in an emergency, the Operator shall give the Respondent owner at least 24 hours notice, and more notice where possible, of access to the Lands;

Access to the Lands shall only be by employees, authorized contractors or agents of the Operator and shall only be to the right-of-way outlined in green in the plan(s) attached to the Right of Entry Order.

Registration at Land Title Office

The Operator shall not allow a claim of builder's or other lien arising out of the construction and operation of the company project to be filed or claimed against the Lands.

Operator's Responsibility During Construction and Operation

The Operator shall conform to all applicable legislation and regulations and shall follow good oilfield practices including but not limited to:

- (a) The Operator shall conserve the top soil in a good and workmanlike manner, having regard to good soil conservation practices and any reasonable request or direction of the owner.

- (c) The Operator shall, during the construction of the pipeline and subsequent reclamation work, take all reasonable precautions to ensure that the natural drainage of the land is not obstructed or impeded.
- (d) If any above-ground installation is authorized by the pipeline permit in connection with the pipeline, the installation shall, subject to any superseding requirement of sound engineering principles, be located to cause minimum inconvenience to farming operations and shall be adequately marked and protected by a pipe or other metal structure clearly visible to the farm operator.
- (e) Following installation of the pipeline, the Operator must leave the surface of the right-of-way in a condition that is as close to its condition prior to installation of the pipeline so that farming operations can continue to be uniform across the Lands.
- (f) All equipment and debris must be promptly removed from the Lands at the end of construction.
- (g) Weed and disease control on the right-of-way shall be co-ordinated and integrated into the Respondent owner's weed and disease control of the entire property.
- (h) The Pipeline must be constructed to a standard such that any surface equipment may cross it at any location.

Maintenance

The Operator shall practice good stewardship of the surface and operate and maintain the right-of-way in accordance with good oilfield and environmental practices.

The Operator shall be responsible for any damage to crops or personal property of the owner or occupant of the land caused by any entry or re-entry by the Operator.

Communication

The Operator shall immediately notify the Respondents of any spill, leak or problem with the pipeline. Notification includes identifying the location of the leak or break and the measures being taken to contain, repair and clean up the leak or break.
