SCHEDULE A

of conditions attached to and forming part

of Order No. E2311/85

1. The Operator shall conserve the top soil in a good and workmanlike manner, having regard to good soil conservation practices and any reasonable request or direction of the owner in connection therewith.
2. The Operator shall exercise reasonable precaution and take whatever measures are necessary to contain its operations to the area granted by the Order, including the travel and movement of vehicles and other equipment.
3. The Operator shall, during the construction of the pipelines and subsequent reclamation work, take all reasonable precautions to ensure that the natural drainage of the land is not obstructed or impeded.
4. If any above-ground installation is required in connection with the pipelines on the right of way, such installation shall, subject to any superseding requirement of sound engineering principles, be so located as to cause the minimum inconvenience to farming operations and shall be adequately marked and protected by a pipe or other metal structure clearly visible to the farm operator.
5. Should a leak or break occur in the pipelines on the right of way, the Operator shall immediately cause the owner or occupant of the land to be notified and informed of the location of the leak or break, and advise the owner of the measures being taken to contain, repair and clean up the leak or break.
6. The Operator shall be responsible for any damage done to crops or personal property of the owner or occupant of the land caused by any entry or re-entry thereon by the Operator, or any person acting by, through or under him, for any purpose authorized pursuant to the Pipeline Act.
