# About PlatformX

PXC is the UK's leading wholesale provider of innovative solutions for connectivity, voice, cloud and security underpinned by the UK's most robust, secure, resilient and reliable network. PXC is uniquely positioned with a scaled customer base and diversified fibre infrastructure partners, powered by a national network covering 98% of homes and businesses. Born from the combination of Virtual1 and TalkTalk's wholesale services and national network business, PXC's deep understanding of the issues that players in the wholesale market face means it knows the right kind of support to offer for businesses big and small.

## Environmental Policy

We believe climate change needs to be tackled urgently, and we fully back the UK Government's target to become net zero by 2050.

Our greatest impact on the environment is in operating our network and in powering connectivity for our customers and this will be the focus of our efforts.

We pledge to continuously reduce our footprint, and our customers' footprint, through mindful innovation. We will use our ever-evolving technology as an enabler for a climate resilient Britain.

To achieve our vision, we will focus on 4 key areas:

1. Our carbon impact: By understanding our carbon footprint, we will continuously reduce the environmental impact of our activities, seek true energy-efficiency and transition to being a zero-carbon business.
2. Our materials: By embracing circularity, we will reduce, reuse, and recycle wherever possible and as much as possible. We will work with our suppliers to create sustainable products and take action to divert waste from landfill.
3. Our people: By actively engaging with our people via a dedicated employee network, we will create a more environmentally focused work culture and empower our workforce to be creative and make sustainable lifestyle choices in and out of the office.
4. Our customers & communities: By delivering the most sustainable service possible and using our unique position as a business to raise awareness, we will build towards a sustainable future for the UK
