About 10X

Our goal is to give investors more money at and in retirement. We achieve this by providing one optimal investment solution.

Three investment principles underlie 10X's life-stage portfolios:

1. Long-term strategic asset allocation
2. Diversification
3. Low fees

10X Life-Stage Retirement Solution

At retirement, you may need your living annuity to last for 20 years or longer. Therefore, contrary to popular belief, most retirees are still long term investors and need to have a long term approach when managing their investments. Investment risk is linked to the term of your investments. The longer your term, the more time you have to ride out a drop in your investments. This holds true even when drawing an income from your investments.

A high equity investment portfolio is optimal for investments of 5 years or longer, as it maximises long-term returns. However over shorter time periods the returns of a high equity investment choice can be very volatile.

10X Living Annuity Investment Portfolios

10X Living Annuity Investment Portfolios

Standard Investment Portfolios

10X Portfolio	1 Month	3 Month	1 Year	3 Year	5 Year	7 Year	10 Year
10X Your Future	0,7%	4,2%	16,6%	13,9%	14,1%	12,2%	9,5%

The 10X difference

Our tried and tested investment philosophy delivers superior returns.

We are future-forward: We take a long-term strategic asset allocation approach, planning for well into the future.

We are all about diversification: We believe being well diversified is the best way to manage risks and uncertainty, and to deliver better long-term returns.

We keep fees as low as possible: We know how fees can erode wealth, holding investors back from reaching their goals. Our fees are low and transparent, and we don't charge performance fees.

This investment strategy works really well for us and, importantly, for our investors. It is the reason we consistently deliver excellent long-term returns and have done so for almost two decades.

The 10X Your Future Portfolio has consistently outperformed the average return of our peers since inception (1 January 2008). Past performance is used here for illustrative purposes.

10X Your Future VS. Average return of large investment managers since inception (before fees)¹

Broadcom Inc	2,1%
Alphabet Inc Class C	1,9%
Meta Platforms Inc Class A	1,7%
Tesla Inc	1,5%
Jpmorgan Chase & Co	1,0%

Low fees

10X charges low total fees to ensure investors save more of their money, and keep more of the investment return.

Consider two retirees; both purchase a living annuity at retirement and draw an initial income of 5% of their savings. The first retiree pays total fees of 2.85% pa (incl. VAT) for advice, administration and investments, which is not uncommon in the industry. The second retiree pays a fee of 0.86% pa (incl. VAT), which is the maximum fee charged by 10X on a sliding scale (where the larger your investment, the lower your fee).

If both retirees draw the same income and increase their income in line with inflation until their income reaches the 17.5% cap, the income would no longer keep pace with inflation thereafter. The chart shows that higher fees impact how long your income will last and keeps pace with inflation in each instance.

10X Living Annuity Policy Fees⁴

Investment value	10X Fee pa incl VAT as a % of investments
First R5 million	0,86%
Next R5 million	0,57%
Above R10 million	0,40%

⁴ An additional fee will be charged for International investment choices

Years income keeps pace with inflation (5% PA Initial draw)
