Read the two texts and mark the sentences at TRUE or FALSE.

Text 1

I will now introduce you to the new self-ordering kiosk in our cafe. First, select between “Eat in’ or “Dine out’ , which is the same as ‘Take away’. Next, select your payment method. You can choose between ‘Cash at counter’ or ‘Card’. On your left you will see a number of categories, such as ‘Special offers’, ‘Ala carte meals’ or ‘Desserts’. Scroll through to find what you are looking for. Select your dish and then select your drink and its size, i.e. small, medium or large. When you have finished, choose ‘Done’ and check if the order that appears on the screen is correct. If it is, make the payment. If you want to pay in cash, go to the counter. If you want to pay by card, choose the type of card and follow the instructions on the pinpad display to complete the payment. After you have done that, your order will be taken to the kitchen. Take your receipt and move to the collection point. You may collect your food there once your receipt number appears on the screen above the counter. Enjoy your meal!

Text 2

Vending machines are a great way to get snacks and drinks on the go. When you use a vending machine, it's as simple as putting in money and pressing the button for the item you want.

Find the price and code underneath the item you wish to buy. Look under the item you want to buy for the code and price. The code will either be a series of numbers, letters, or both that you type in. The price is usually to the right of the code.

Insert the correct amount of money for the item. Smooth out any bills that you're inserting into the machine so they're wrinkle-free, otherwise the machine may not accept them. Look at the sticker next to the bill slot in order to find the correct way to put the bill in. If you're using coins, put them in the coin slot. The amount of money you put into the machine should appear on the machine's screen.

Swipe your credit card if it's a newer machine. Newer models of vending machines also let you pay with a card if you don't have any cash on you. Locate the credit card reader next to where you insert bills. Swipe your card.

Type in the code or press the button for your item. Double check the code for the item you want and put it in. If you make a mistake, press the clear or cancel button on the keypad. If the machine you're using doesn't require a code, then just press the button for your item. When you type in the code, the machine will dispense your item so you can take it out.

Check the coin chute for any change. Look for the coin chute below where you insert the money. If you put in more money than you should, lift the flap and take your change.

Enjoy your food/drink!
