Ratchet Back Height Adjustment
To raise the back, slowly lift the back up until you hear a series of 4 to 5 clicks. Each click represents a position where the back will lock into place.
To lower the back, raise the back all the way up until tension is released - the back will then return to the lowest position without stopping.
Raise back up to desired position.

If the up/down operation of the ratchet back feels tight, raise and lower the back several times after assembling the chair to insure smooth functioning.
