

Adding Mailchimp Forms to a Squarespace Website

To add the Mailchimp Code Snippet to your Squarespace site, follow these instructions.

1. Go to the **Settings** option in the main menu of your Squarespace.
2. Under **Website**, click on **Advanced**.
3. In the **Code Injection** section, you will see **Header** and **Footer** options.
4. To add the custom Javascript snippet to all pages, you need to add it to the **Footer** section.
5. Paste your Mailchimp Forms Code Snippet into the **Footer** section. Your Mailchimp Forms Code Snippet can be found in your Mailchimp account in the top right hand menu under Integrations. It will look something like this

```
<script defer src='https://form-assets.mailchimp.com/snippet/account/#####'  
'></script>
```

6. Save the changes and you're all set!

Once you have completed these steps, the Mailchimp Forms Code Snippet will be added to all pages on your Squarespace site.
