

# BigCommerce Integration

This help article will guide you through obtaining and installing the Mailchimp Forms Code Snippet on your BigCommerce store using the Script Manager inside of BigCommerce.

## Finding Your Mailchimp Forms Code Snippet

1. From the New Mailchimp Forms builder, navigate to the "Integrations" section.
2. Click on "Manual Code Snippet Install."
3. Here, you will find your unique Mailchimp Forms Code Snippet. Copy the code snippet to your clipboard.

## Installing Your Mailchimp Forms Code Snippet on Your BigCommerce Store Using Script Manager

1. Log in to your BigCommerce account.
2. In the sidebar, click on "Storefront" and then "Script Manager."
3. Click on "Create a Script."
4. Enter a name (e.g., "Mailchimp") and description for the script.
5. Choose "Footer" for the script location on the page (this places the script before the closing `</body>` tag) and select "All Pages" for the script placement.
6. Scroll down to the "Script Type" section, choose "Script," and paste the Mailchimp Forms Code Snippet you copied earlier into the "Scripts Content" box.
7. Click "Save" to finish adding the script.
8. Test your site to ensure the Mailchimp Forms Code Snippet is working as expected.
