

Manually Installing the Mailchimp Forms Code Snippet on Your Shopify Theme

Please note: We do not recommend this manual method for installing the Mailchimp Forms Code Snippet on your Shopify theme. Instead, we strongly encourage you to use the Mailchimp Forms Shopify App for a seamless and easy installation process. However, if you prefer to install the snippet manually, please follow the step-by-step instructions provided below.

Adding the Mailchimp Forms Snippet to your theme.liquid file

1. Sign in to your Shopify account
2. Navigate to Online Store from the left-hand side menu
3. Click on "Edit code" for your current theme from the three dots dropdown menu
4. Locate the theme.liquid file and open it
5. Scroll all the way down the bottom of your theme.liquid file
6. Paste the Mailchimp Forms Code Snippet into the theme.liquid file before the closing `</body>` tag
7. Save your changes

Congratulations! You have successfully installed the Mailchimp Forms Code Snippet on your Shopify theme manually. If you encounter any issues or need further assistance, consider using the Mailchimp Forms Shopify App for an easier installation process, or reach out to our support team for help!.

How to Confirm Your Installation

1. Visit your Shopify store after adding the Mailchimp Forms Code Snippet to your theme
2. Open the browser's console

You can open your browser's console by right-clicking anywhere on the page, and from the context menu, select "Inspect" or "Inspect Element" (the wording may vary depending on your browser). This will open your browser's Developer Tools. Click on the "Console" tab to access the console.

3. Check for Mailchimp FormsConfig in the Console to determine if Mailchimp Forms has been installed. In the console, type `Mailchimp FormsConfig` and press Enter.
 - If the console returns an array, this indicates that Mailchimp Forms is successfully installed on your site.
 - If the console returns a message such as `Uncaught ReferenceError: Mailchimp FormsConfig is not defined`, it means that the Mailchimp Forms Code Snippet has not been properly installed on your theme.

If you find that Mailchimp Forms has not been installed correctly, review the installation steps to ensure you have followed them accurately, or reach out for assistance!
