Palm Oil Supply Chains

Specialty Fats

Our specialty fats business has been a member of RSPO since 2006 and supply chain certified since 2011. 100% of its palm oil is physically RSPO certified with the vast majority of procurement coming from Identity Preserved mills, ensuring the highest global environmental and social standards are met.

Dairy

Our dairy operation in Malaysia uses palm oil in the manufacture of fat-filled milk powder. As well as supplying clean, hygienic, wholesome and fully-traceable milk, we are switching to RSPO certified palm oil in the production of these milk powders and aim to achieve 100% certified palm oil by 2025.
