

Cashew

We are a fully-integrated cashew supplier in the major producing and processing origins.

SOURCING

Since 1989, we have built exceptional cashew sourcing networks across Asia and Africa. Dedicated teams work in farming communities all year round, providing timely insight on raw cashew nut quality and crop profiles. This is enhanced by long-term relationships with growers, cooperatives and local trader networks, minimizing the risk of supply interruptions for our customers.

Since we work with the farmers and cooperatives, we can also offer fully traceable Organic and Fairtrade cashews.

PROCESSING

Across Asia and Africa, we have more than 10 cashew processing and packaging facilities, which meets the exact quality, food safety and traceability standards of our customers.

We offer customized cashew whole grades and ingredients, as well as Kosher and Halal certified cashews. We are the largest processor in origin with pasteurization capability and validated 5-log reduction.

Our propriety foreign material removal system ensures top quality supply to our customers.

SUSTAINABILITY

Our vision is to scale positive impact in cashew supply chains through partnerships to help tackle the most pressing issues facing cashew farmers and their communities.

Cashew Trail sets 2030 targets across ofi's cashew business, from farm to factory – in line with the United Nation's Sustainable Development Goals and ofi's commitment to deliver naturally good, sustainable ingredients. These include an ambitious goal to fight poverty and create economic opportunity by improving the livelihoods of people living in cashew communities and growing farmer yields.

Our **Impact Report** highlights our progress on each of our trail's 2030 goals and provides a deeper look into our various programs throughout different origins that support the communities and industry.
