

Hazelnut

We are the largest independent supplier of natural and processed hazelnut products grown by farmers in Türkiye. Offering a range of varieties, kernel sizes and ingredients to develop new applications for all segments.

SOURCING

While our hazelnuts are sourced from Türkiye, where 70% of the world's hazelnuts are grown, ofi's extensive network allows sourcing from several different regions to meet our customer's demand.

PROCESSING

In 2011 ofi acquired Progida, a leading hazelnut exporter and pioneer investor in hazelnut processing in Türkiye.

We continue to invest in infrastructure, talent and technology such as cold storage, pasteurization, and X-ray sorting.

CERTIFICATIONS

SUSTAINABILITY

Our vision: creating a collaborative trail to sustainable hazelnuts by addressing the most pressing issues facing hazelnut farmers, their communities and migrant workers.

Hazelnut Trail sets targets across ofi's hazelnut business from farm to factory—in line with the United Nation's Sustainable Development Goals and ofi's commitment to deliver naturally good, sustainable ingredients. This starts by building on the human rights progress we've made over the last decade with our partners and the commitment to eliminate unsafe working conditions and risks of child labor in our supply chains by 2030.

Our **Impact Report** highlights our progress on each of our trail's 2030 goals and provides a deeper look into our various programs throughout different origins that support the communities and industry.
