- Designed by ex special forces for ease of use
- Panic button for Automatic alerts
- Instant notifications for admins and law enforcement
- Safety check-ins
- Push notifications
- Privacy protection

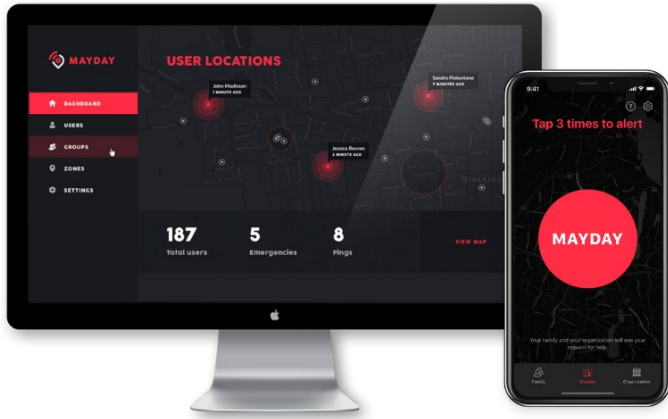

#### COMPREHENSIVE CAPABILITIES

- Streamlined emergency response
- Direct connection with Law Enforcement systems
- Integrate existing security and safety systems
- Integrate sensors, communications systems, advanced applications and data feeds

# MAYDAY SAFETY CAPABILITIES & BENEFITS

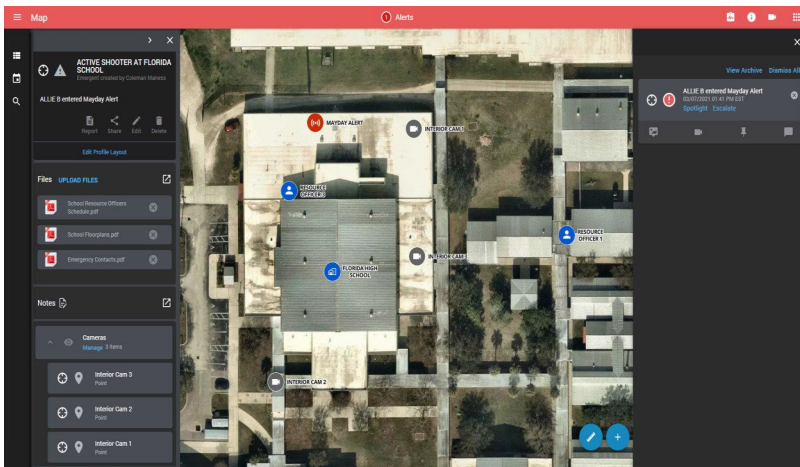

## ALERTING APPLICATION & DASHBOARD

The Mayday Safety Application and Dashboard are intuitive and can be uniquely configured for each school or organization. The application can be downloaded on any Android or IOS device and administrators can access the dashboard from any internet connected device to create custom rules and configure their users or organization.

There are multiple configuration options including geofencing, customizing notifications or safety checks, and assigning user permissions to designate which users can alert internally with organization admins or directly with law enforcement. When approved users activate the panic button administrators and law enforcement are immediately notified, and the user will be directly connected with 911.

## COMPREHENSIVE COMMAND & CONTROL

- Advanced Common Operating Picture With GIS
- Integration Facilities Floorplan Overlays
- Critical Data Integrations
- Collaborative Event Planning and Management Ability to
- Automatically Share Data Following Panic Alarm
