

Our energy products

We have a variety of products that fix the unit price of your electricity for the duration of your contract (up to five years). And you can choose a number of ways to handle Third-Party Costs (TPCs).

Complete

Haven Complete offers you budget certainty and allows you to fully fix your energy and all existing TPCs. This eliminates your exposure to future price increases and reduces your business risk.

Assured

Haven Assured gives you the ability to fix a majority of TPCs. We'll pass through the TPCs that aren't fixed and show them clearly on your bills.

Standard

Haven Standard includes some TPCs (FiT, RO, TNUoS, DUoS and BSUoS) at a built-in threshold. This means that future increases within the threshold limit won't affect you; we'll pass through any increases over the threshold (plus CfD and CM too).

Pass-through

For half-hourly customers who are happy with an element of risk, we fix distribution and transmission losses costs but pass through all other TPCs. You'll pay the published rates, which you'll see on your bill.

Haven Advantage

If you choose a 12-month contract, you can benefit from Haven Advantage for any of the above products. This applies from the moment you sign your contract through to 6 months after the supply start date. During this period, if the price of power falls by £4/MWh or more, you can extend your contract for a further 12 months at the improved power price. This means you'll see the savings reflected immediately in your bills.
