

Energy is less than
40% of your bill

The rest of your bill is made up of **Third Party Costs**, so it's important to understand what they're for:

TPCs

Climate Change Levy

A tax that encourages businesses to reduce harmful carbon emissions

Renewables Obligation

Supports and incentivises large scale renewable generation

Balancing Services Use of System

Recovers the cost of operating and balancing the electricity system

Distribution Use of System

Covers the cost of installing, operating and maintaining safe and reliable electricity supplies

Transmission Network Use of System

Covers the cost of installing and maintaining the transmission system in England, Wales, Scotland and offshore

Capacity Market

Ensures UK has enough electricity on the Grid to cover peak demand

Contracts for Difference

Encourages new low carbon generation by guaranteeing generators a certain price for their energy.

Feed in Tariff

Pays those who generate their own renewable energy
