

Cyware Orchestrate

Unleash your SOC with Hyper-orchestration and AI-Powered Automation

Cyware Orchestrate empowers security teams with advanced orchestration and automation capabilities, enabling end-to-end threat response and intelligence-driven workflows, augmented by AI. Built for modern SOC's, Cyware Orchestrate brings together decision-making intelligence, seamless integrations, and real-time incident response, all in one place.

Key Capabilities

Low-code and no-code automation with visual playbooks, reusable templates, and AI Assist to auto-generate Python code for faster, smarter workflow creation.

Hyper-orchestration across SecOps, IT, and DevOps using real-time data flows, persistent logic, and autonomous response actions across diverse systems.

400+ pre-built integrations to connect security, ITSM, and DevOps tools through APIs and customizable apps.

Secure cloud-to-on-premise automation using a lightweight integrator agent that enables orchestration across environments without exposing internal networks.

AI-driven intelligent automation enriches context, correlates data, and reduces manual tasks to enhance analyst productivity and accelerate threat response.

Why Cyware Orchestrate?

Low-Code/No-Code Automation

Simplify security operations at scale with low-code/no-code automation, requiring minimal time, effort, and technical expertise.

Cloud to On-Premises Orchestration

Unify security across environments through seamless orchestration from cloud to on-premises systems.

End-to-End Automation

Achieve end-to-end automation across cyber, IT, and DevOps workflows to accelerate response and reduce threat dwell time.

400+ Pre-Built Integrations

Leverage 400+ pre-built integrations to connect your security tools, optimize workflows, and boost SOC performance.

A Closer Look at the Cyware Advantage

Capability

Orchestration

Legacy SOAR

Static orchestration without intelligence

Flexibility and Scale

Low scalability across multiple use cases or environments

Interoperability and Integrations

Limited integrations and vendor lock-in

Customizable Playbooks

Standard or default playbooks, pay-per-playbook

Deployment

Limited deployment options

Cyware Orchestrate

Hyper-orchestration with threat intelligence-driven, AI-powered workflows

Engineered for scale across diverse environments

Bi-directional integration with 400+ powerful tools

Unlimited custom playbooks with an extensive library of playbook templates

Deploy anywhere in the cloud or on-premises environment

About Cyware

Cyware is leading the industry in Operational Threat Intelligence and Collective Defense, helping security teams transform threat intelligence from fragmented data points to actionable, real-time decisions. We unify threat intelligence management, intel sharing and collaboration, as well as hyper-orchestration and automation—eliminating silos and enabling organizations to outmaneuver adversaries faster and more effectively. From enterprises to government agencies and ISACs, Cyware empowers defenders to turn intelligence into impact.
