

Cyware Respond

AI-powered Threat Response and Incident Management

Cyware Respond is an AI-powered end-to-end incident management platform designed to connect the dots between threat actors, incidents, malware, and vulnerabilities across your security ecosystem. By enabling real-time threat correlation, AI-powered workflow optimization, automated response actions, and centralized case management, Cyware Respond enables security teams to prioritize, investigate, and mitigate threats at machine speed.

Capabilities Driving Threat Response

Unified Threat and Incident Management

Centralize incident, malware, vulnerability, campaign, and threat actor tracking. Leverage customizable workflows, forms, and visual threat mapping to streamline response operations and enhance situational awareness.

Intelligent Automation and Orchestration

Automate response and action management with custom playbooks. Integrate seamlessly with existing tools via Open APIs, webhooks, and BYOM to create a tailored threat response ecosystem.

AI-Powered Threat Correlation and Analysis

Use advanced AI/ML to correlate IOCs, TTPs, vulnerabilities, and impacted assets. Empower proactive threat hunting, root cause analysis, and continuous mapping to MITRE ATT&CK for smarter defense.

Multi-Tenant Security Operations

Support enterprises and MSSPs with a centralized, multi-tenant dashboard for managing SLAs, KPIs, incidents, and resources across business units or customers.

Advanced Reporting and Governance

Track SOC metrics like MTTD, MTTR, and incident costs. Schedule reports, measure ROI, and send executive threat briefings with full auditability and governance.

Cyware Respond Tackles Cybersecurity Roadblocks

Cybersecurity Challenges

Threat intelligence remains underutilized as most organizations fail to translate it into real-time, actionable security outcomes.

Siloed collaboration and limited resources weaken defense by restricting threat intel sharing and stretching already overburdened teams.

Fragmented tools cripple visibility and response with disconnected systems creating silos that prevent coordinated threat defense.

Manual response drains resources as slow, labor-intensive processes delay threat containment and overwhelm security teams.

How Cyware Respond Solves Them

Operationalizes threat intelligence by automating the ingestion, analysis, enrichment, and sharing of threat intelligence from diverse sources and enabling AI-driven threat response.

Improves collaboration and efficiency by centralizing case management, enabling cross-team coordination, and supporting threat intel sharing across internal and external stakeholders.

Eliminates tool sprawl with pre-built integrations across SIEM, EDR, firewalls, and more, delivering unified visibility and orchestrated response.

Accelerates response with automation by enabling low-code/no-code playbooks and case management, significantly reducing mean time to respond (MTTR).

Powering Intelligent, Real-Time Threat Response

Accelerate Threat Response with AI-Powered Automation

Free security teams from manual, repetitive tasks. Cyware's AI-driven threat response platform streamlines threat prioritization, correlation, and response so that security teams can focus on strategic decision-making.

Connect the Dots

Seamlessly connect the dots between vulnerabilities, IOCs, TTPs, and threat actors. Cyware fuses intelligence and operational context in real time, with AI Assist providing smart suggestions to help analysts uncover root causes and make faster, smarter decisions.

Integrate Effortlessly with Your Security Stack

Leverage Cyware's plug-and-play integrations with leading security tools, enabling seamless data flow and automated workflows, without the need for rip and replace.

Shift from Reactive to Proactive Security

Move beyond alert fatigue. With Cyware's contextual intelligence and automated response capabilities, security teams can act with confidence and precision, neutralizing threats before they escalate.

About Cyware

Cyware is leading the industry in Operational Threat Intelligence and Collective Defense, helping security teams transform threat intelligence from fragmented data points to actionable, real-time decisions. We unify threat intelligence management, intel sharing and collaboration, as well as hyper-orchestration and automation—eliminating silos and enabling organizations to outmaneuver adversaries faster and more effectively. From enterprises to government agencies and ISACs, Cyware empowers defenders to turn intelligence into impact.
