Streamline Your Compliance Journey and Strengthen Cyber Resilience with Cyware

The Challenge

Every regulatory framework and standard, regardless of industry or region, is designed to strengthen cyber resilience.

However, evolving threats, fragmented mandates, and overlapping requirements create mounting challenges for security teams, turning compliance into a moving target. Simply meeting regulatory compliance is not enough. Additionally, the traditional Governance, Risk, and Compliance (GRC) tools lack the cybersecurity depth needed to bridge compliance with real security, leaving organizations questioning **whether compliance alone truly enhances their resilience.**

The Solution

Organizations need a **future-ready approach** that not only streamlines compliance but also strengthens resilience against evolving threats. The key lies in **operationalizing threat intelligence — enabling proactive threat prediction, automated response, and seamless collaboration.**

A unified approach brings together real-time monitoring, risk-based profiling, and intelligence sharing with automated incident response, compliance analytics, and data protection. This not only ensures seamless regulatory adherence but also transforms compliance from a checkbox exercise into a powerful security enabler — **accelerating compliance, minimizing risk, and fortifying cyber resilience for long-term protection.**
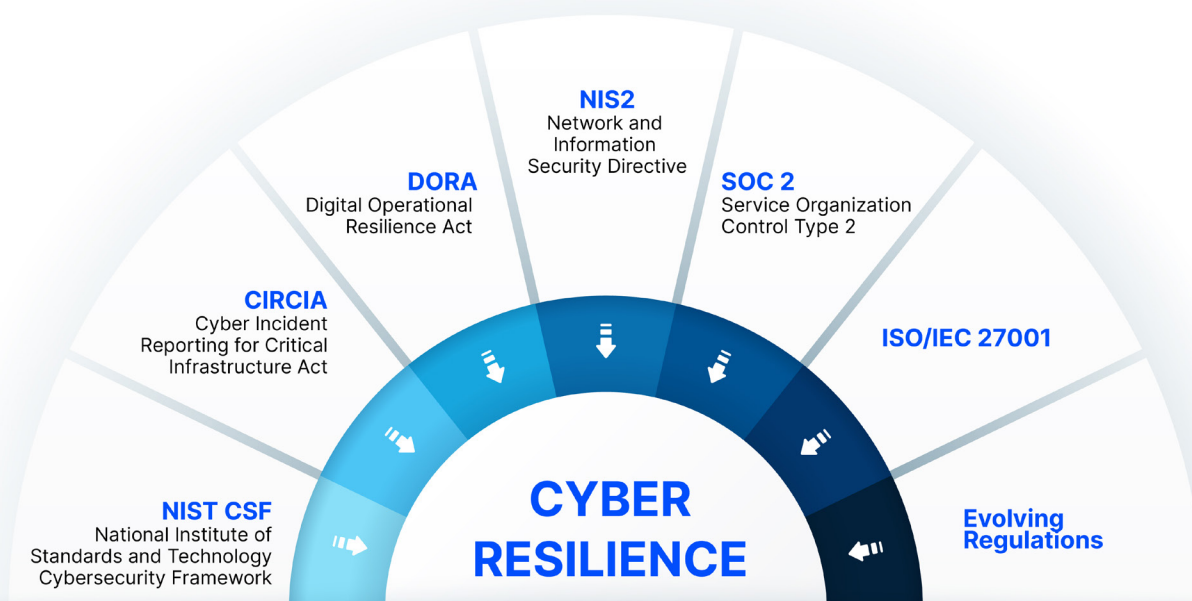

CYWARE™

Move from Compliance Chaos to Clarity

Cyware solutions address compliance requirements end-to-end, transforming it into a seamless, proactive process by integrating threat intelligence, security automation, incident response, and reporting. This enhances the effectiveness of GRC initiatives, streamlines operations, and moves organizations beyond reactive security.

With this **unified approach**, organizations can stay ahead of evolving regulations, detect and mitigate threats faster, and **build a resilient defense across the entire threat lifecycle.**

Accelerate Compliance Adherence, Strengthen Security, and Build Resilient Cyber Defenses

Threat Contextualization	Real-Time Crisis Communication & Threat Coordination	Compliance Analytics & Dashboarding	Real-Time Compliance Monitoring & Reporting	
Risk Based Profiling and Prioritization	Situational Awareness & Threat Landscape Visibility	Audit Readiness & Historical Data Retention	Data Protection & Access Control Enforcement	
Vulnerability Management				

Unified Threat Intelligence Management With Cyware Intel Exchange - Gain a comprehensive view of your cyber threat landscape by aggregating intelligence from internal systems, external feeds, and ISACs, enabling proactive threat detection, vulnerability management, and risk mitigation.

Seamless Threat Intelligence Sharing for Collective Defense With Cyware Collaborate – Facilitate secure, real-time collaboration across sectors and regions to comply with information-sharing mandates, allowing organizations to detect and counter threats early while reducing risks to critical infrastructure.

Automated Security & Compliance Orchestration with Cyware Orchestrate – Streamline compliance-driven security workflows by automating regulatory research, policy enforcement, control testing, and audit preparation, enabling security and GRC teams to focus on strategic priorities.

Centralized Incident Reporting & Response with Cyware Respond – Automate incident detection, reporting, and compliance monitoring to ensure accurate regulatory adherence while swiftly mitigating security risks.

Why Cyware?

- **Trusted Threat Intelligence Platform**
- **Proven Experience and Expertise**
- **Comprehensive Security & Compliance Solutions**
- **Seamless Integration with Tools and Technologies**
- **Compliant & Secure Data Handling**

About Cyware

Cyware helps enterprise cybersecurity teams build platform-agnostic cyber fusion centers by delivering cyber threat intelligence and next-generation security orchestration and automation solutions. As a result, organizations can increase speed and accuracy while reducing costs and analyst burnout. Cyware Cyber Fusion solutions enable secure collaboration, information sharing, and enhanced threat visibility for MSSPs, enterprises, government agencies, and sharing communities (ISAC/ISAO/CERTs and others) of all sizes and needs.
