

Environmental Sustainability Policy

At nCino, we acknowledge our role and responsibility towards protecting and nurturing the environment. As a leading a software provider, nCino is not a major contributor to greenhouse gas emissions. We nevertheless remain committed to advancing sustainable progress by taking proactive measures across all our operations and supply chains worldwide.

Over the last decade, we've worked to minimize our carbon footprint through strategic actions aimed at eliminating or reducing GHG emissions and other pollutants, in line with global and local environmental legislation. Our policy is to continue to do so by taking the following active measures.

In delivering on this policy, nCino is committed to a program of continual improvement and will execute on the above actions to drive toward increased sustainability.

Action	Cadence
Measure and analyze carbon footprint of our business activities.	Yearly
Implement improvement program to reduce greenhouse emissions, where possible.	As needed
Prevent unnecessary pollution, where possible.	As needed
Reduce consumption of resources through waste management strategies that promote resource minimization and recycling.	Ongoing
Incorporate energy efficient measures into all nCino offices and facilities globally.	As needed
Promote and continue to invest in technologies that provide alternatives to business travel.	Ongoing
Execute on an emissions reduction program with a focus on energy efficiency programs, renewable energy procurement, travel management programs, and collaboration technology.	Ongoing
Commit to decreasing our emissions on a year over year basis as we strive toward being net zero.	Ongoing
