# nCino's Integration with RDC

Overview

nCino has expanded its nCino IQ offerings by partnering with RDC, integrating its explainable AI technology to enhance credit monitoring and decision-making processes. This collaboration provides financial institutions with predictive analytics to efficiently manage risk and optimize credit portfolios through data and AI driven insights for early warnings and lead limits.

Key Features

Enhance Credit Monitoring: Shift from reactive to proactive credit risk management by detecting changes in customer behaviour and deteriorating credit earlier.

Improve Efficiency: Simplify manual processes with streamlined, automated workflows, leading to significant time savings.

Maximize Explainable, Data-driven Conversations: Enable transparent, data-backed discussions with customers by providing clear, explainable insights behind every decision.

Drive growth: Easily assess customer health and uncover new revenue opportunities to drive growth.
