

The Power of AI in Financial Services

The transformative power of artificial intelligences (AI) is reshaping financial services, enhancing efficiency, delivering data-driven insights, and reshaping customer experiences. nCino's innovative nIQ solutions empower financial institutions to seamlessly harness the power of AI, driving innovation, reducing costs, and ushering in a new era of digital finance.

Harnessing the power of data, nIQ delivers intelligent automation, unique insights, and industry benchmarking capabilities to:

Deliver Personalized Experiences

Improve Risk Management & Compliance

Increase Operational Efficiency

Maintain Growth

"Cloud is the enabler, data is the driver, and AI is the differentiator."

Julie Sweet, CEO of Accenture

75%

of FIs are in experimental stage of AI adoption

(The Financial Brand)

\$2-3.4B

AI could boost annual revenue ranging from \$2-3.4 billion

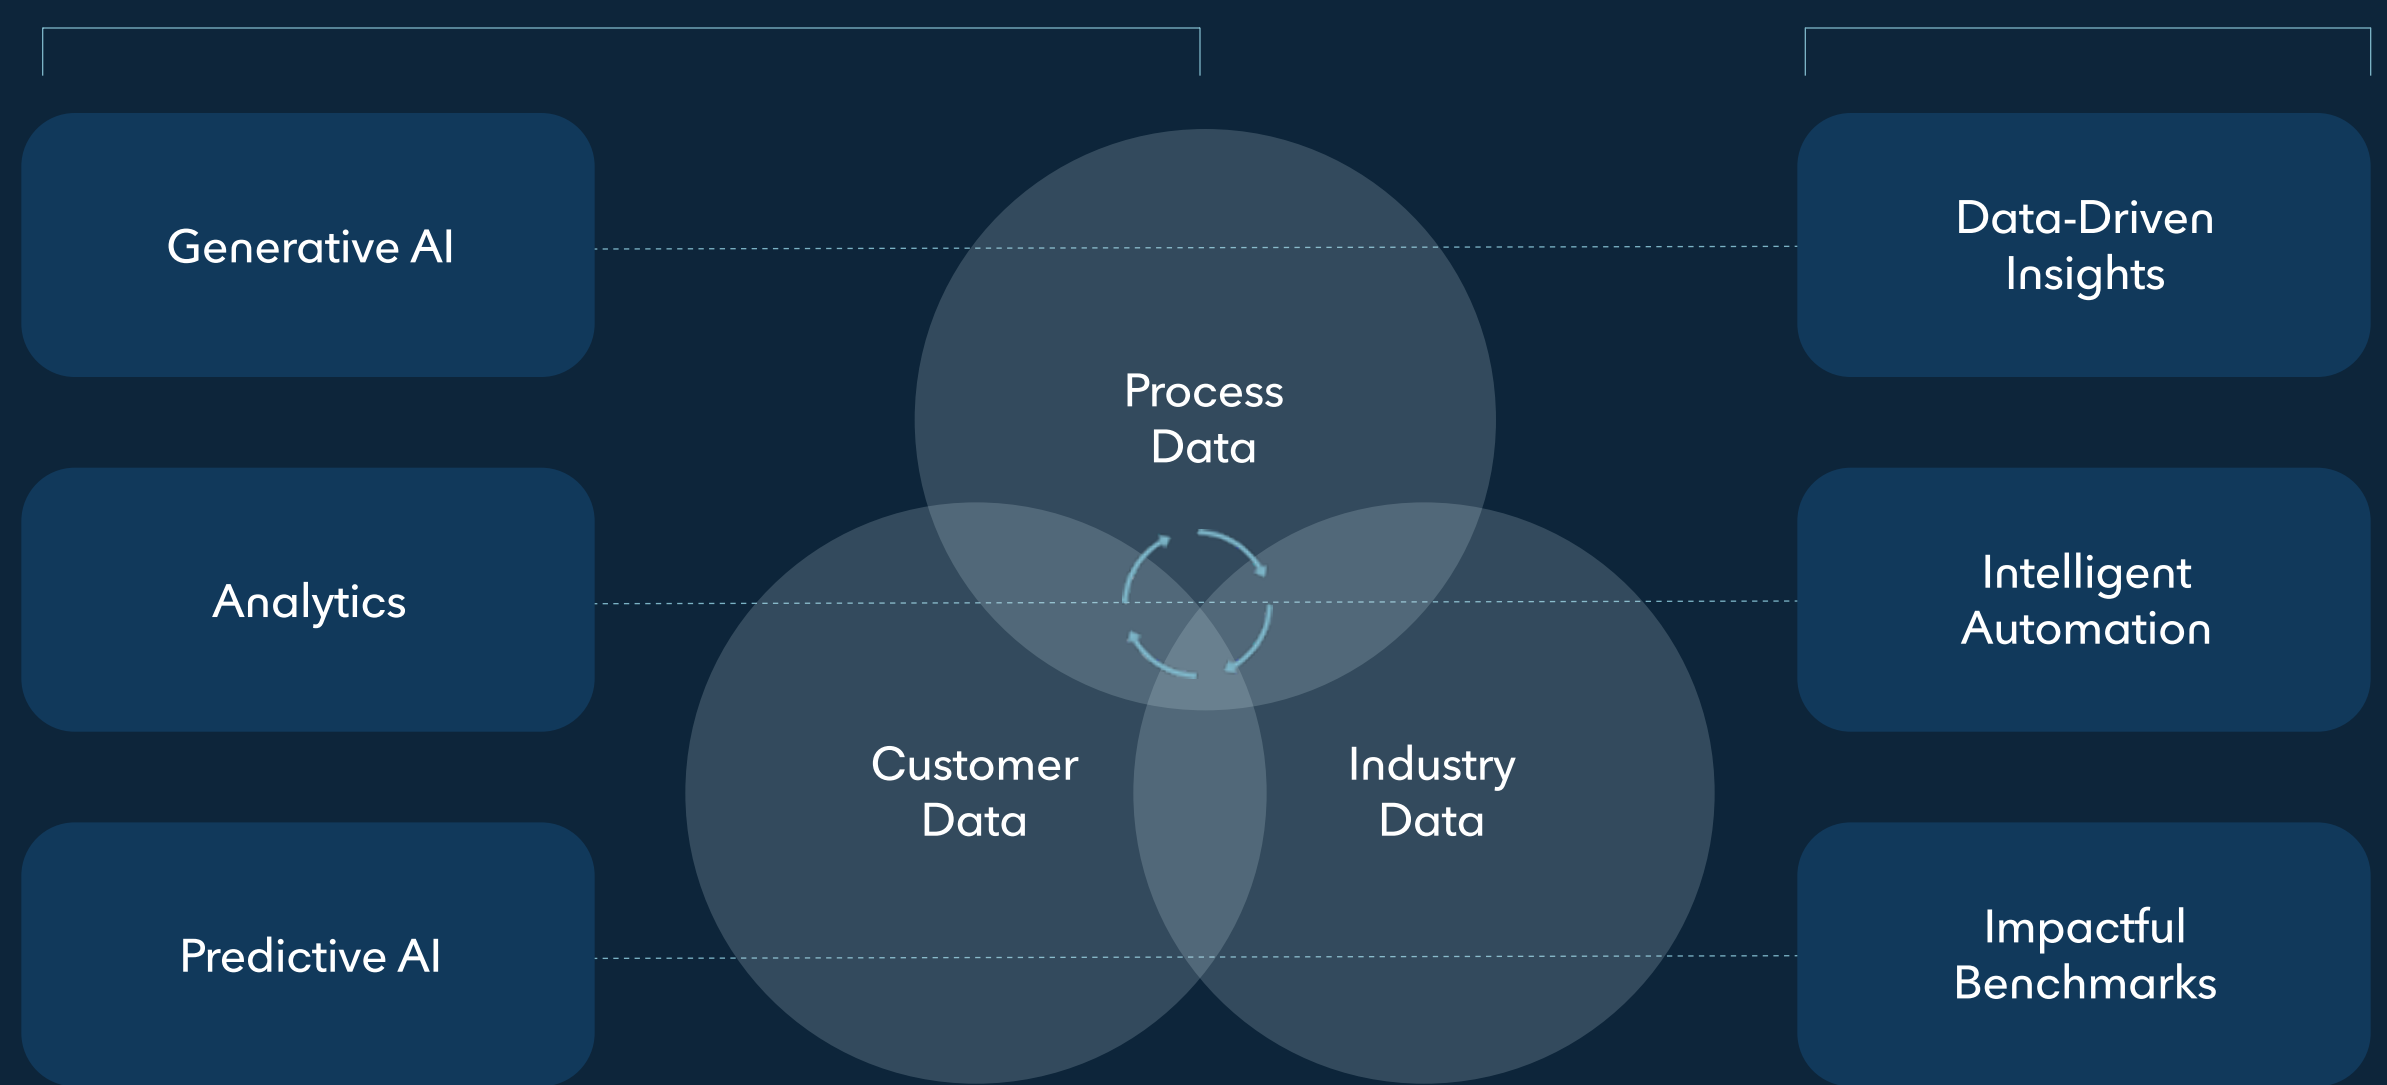

(McKinsey)

77%

of bankers see unlocking the value of AI as a key competitive differentiator

(Forbes)

Leveraging nCino's robust data infrastructure, nIQ equips financial institutions (FIs) with a powerful resource for competitive differentiation.

The nCino Data Community

The nCino Data Community, an industry-wide secured data lake, provides amplified insights that enable performance analysis, industry benchmarking and strategic decision making for participating financial institutions.
