

Payouts

Empowering your business to move money globally quickly and efficiently

Tired of navigating complex payout processes and looking to harmonize your customer experience? We handle the complexity so you can focus on building experiences your customers want. Payouts from Worldpay let you send money globally in different currencies and conveniently to billions of bank accounts, cards or wallets – faster and with more certainty and scalability than before. We keep all your beneficiaries – including customers, sellers, freelancers, vendors and partners – satisfied.

Five ways your business benefits

1 Span the globe

Send cross-border payments to 180+ countries in over 135 currencies in multiple ways. We use domestic clearing schemes (where available) to avoid the costly SWIFT network.

2 Cut operational costs

Reduce the high processing costs of managing multiple vendors and lock your FX rate for 24 hours to reduce currency risk and help manage your cashflow.

3 Move money faster around the world

Send payments instantly, the same or next working day. We can facilitate real-time payouts to accounts in 70+ countries. All payouts to cards and wallets are in real-time.

4 Automate your payouts through a single platform

Process payouts with minimal effort. Our API or Portal enables automation – check balances and statements, confirm payout's status, view FX rates and more – all through one trusted provider. You can leverage acquired funds from your customers, alternative payment methods or bank transfer to fund your payouts.

5 Maximize your payouts' success rate

Our multi-partner model and retry logic help ensure payouts go through smoothly. If one partner is unavailable, we will automatically try another – for higher success rates and greater reliability. Our network's combined strength means your payouts are more efficient, with less manual work for you.

Choose the right fit for your business

Customers and businesses expect to pay or be paid their preferred way. To keep them satisfied and build trust, choose to process payouts in one of three ways:

Send payments globally to bank accounts in a flash

Our Push to Account solution can transfer funds directly to recipients' bank accounts in over 180 countries with most settling in real-time, same or next working day.

- 135 currencies available
- FX rates agreed upfront and guaranteed for 24 hours
- Beneficiary data templates and account verification provided to minimize errors and reduce fraud
- Instruct single or batch payouts via Portal or API
- Payouts funded either via bank transfer or automated by using an existing acquiring flow with Worldpay

Make payouts to wallets fast and easy

Our Push to Wallet solution enables you to reach beneficiaries in highly digitized markets with real-time payouts.

- Funds are available in real-time and local currency
- FX rates agreed upfront and guaranteed for 24 hours
- Connect to over 3 billion beneficiaries worldwide through our network of wallet partners
- Payout to wallets like PayPal®, WeChat Pay, GCash, Alipay, GrabPay and more
- Available via the same integration as payouts to accounts

Transfer funds to cards instantly

Our Push to Card solution enables transfer of funds to recipients' debit or credit cards within 30 minutes in 120+ countries through trusted networks Visa® and Mastercard®.

- Send payments easily using the same set of card details regardless of the recipient's country
- Confirm cards' eligibility for fast funds upfront to avoid delays
- Verify cardholder's registered name before instructing a payout to reduce the risk of errors or fraud
- Keep customers' card data safe with the help of Visa and Mastercard's security features
- Simplify PCI compliance with our customizable page that securely collects card details and tokens
- Get same-day access to your funds, with card payouts automatically deducted from your next-day settlement
