Virtual cards

The smart solution for global supplier payments

Juggling high-volume supplier payments shouldn't be a constant challenge. Yet, FX risks, complex bookings and strict financial regulations make it difficult to run efficient operations. Tracking and reconciling payments across multiple components only adds to the challenge, costing time and shrinking profit margins.

With Worldpay's virtual cards, you can transform your supplier payments and earn a share of interchange revenue on your transactions. A single integration lets you pay suppliers in seconds with automated card issuing, enhanced security and better financial control.

16 currencies available for load and settlement of cards

30+ issuing countries to support a truly global solution

1 integration provides access to all interchange tiers

Benefits

Enhance cashflow and strengthen relationships
Issue virtual cards in 16 currencies to pay suppliers fast in their preferred currency, avoiding delays and FX complexities. One single integration gives you access to all interchange tiers to help improve your supplier acceptance rates.

Increase spend control and mitigate fraud risk
Our API or Portal enables easy access to effortlessly issue, block or cancel single use cards as well as set precise rules on how, where and when your virtual cards are used - control merchant category, spending limits, validity and more.

Simplify reconciliation and drive back-office savings
Optimise your payment processes by automatically assigning unique virtual card numbers to a single booking or supplier payment, reducing manual errors and streamlining financial operations with easier tracking, faster refunds and reporting accuracy.

Worldpay bridging travel payments

Tailor supplier payment terms, pre-negotiating acceptance costs to ensure smooth transactions. As a trusted partner we work to strengthen supplier collaboration while ensuring optimised payment processes for both parties.
