

“I have been very pleased with the way Digital Commons has improved my life as an editor. It is so refreshing to devote my time to the papers rather than to the process.”

— Judy Chevalier, Yale School of Management

Research Intelligence

A comprehensive and customizable platform for journal publishing

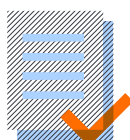

Digital Commons Journals is a secure, all-in-one publishing platform that grows and adapts with you — whether your institution is in the early stages of developing a journal publishing strategy or has an established publishing program that you’re seeking to grow. Digital Commons Journals offers professional

and beautiful journals that provide design with multilingual support in a fully supported and hosted model that complies with Scopus’ technical requirements. Digital Commons Journals makes it easy to launch and develop an OA journal publishing program to drive readership, downloads and citations.

Digital Commons Journals is a comprehensive and customizable platform for journal publishing

Journals

400+
institutions

30+
countries

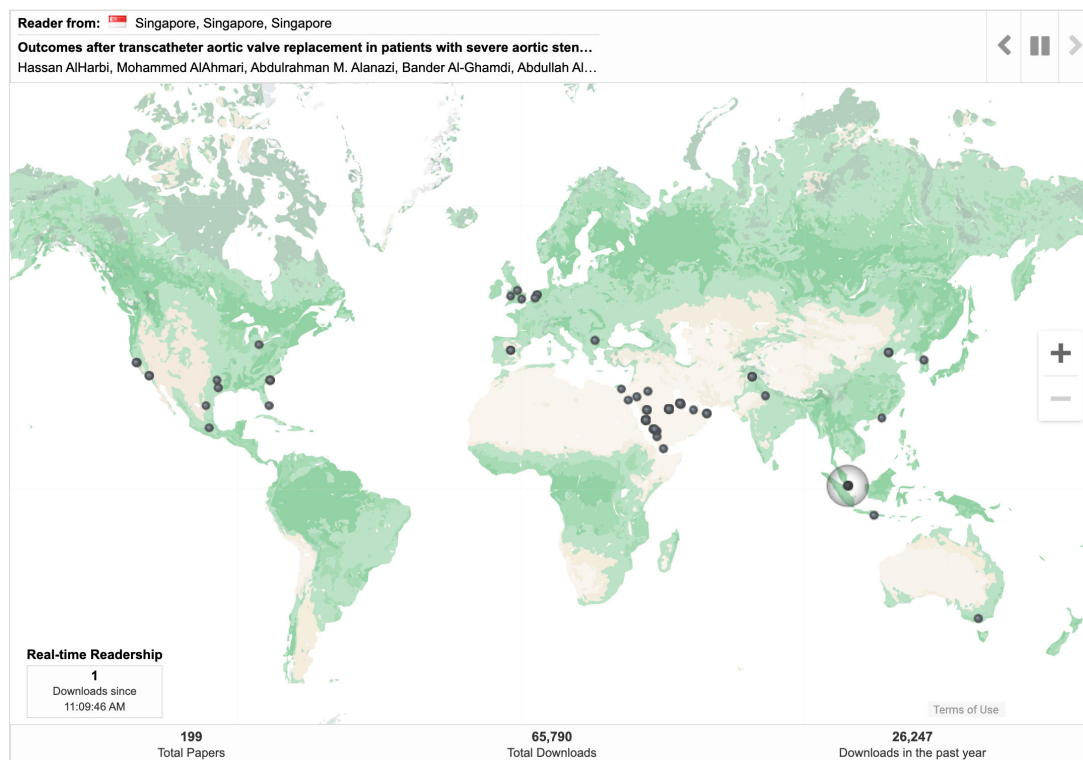

Digital Commons Journals has an audience of **450 million** readers. The average journal article on Digital Commons receives more than **400 downloads** per article.

Build a world-class publishing program with Digital Commons Journals

Premier Journals offer a full suite of tools to demonstrate impact to editors and authors

Digital Commons Premier helps journals comply with selective criteria of indexes like Scopus, Web of Science, PubMed Central and DOAJ. Digital Commons simplifies the production process for journals by providing typesetting and other services for these Premier journals as well as offering superior journal

management with Aries Editorial Manager. Premier Journals are enabled with tools that streamline the reviewer invitation process and provide access to a highly trained Strategic Advisor, a publishing specialist on topics related to indexing, journal improvement and growth.

Journals showcase global readership in real-time downloads maps.

Journal editors and authors can also analyze performance by viewing downloads over time, accessing PlumX Metrics or with interactive global visibility dashboards.

Support every step of the way

Digital Commons Journals is a fully-hosted solution — all software maintenance, configuration and implementation is managed by our systems and development team, saving you valuable time and reducing the need for local IT support.

- Dedicated support and software upgrades included
- Training for all administrators on how to use the system
- Personalized support model with unlimited support from your designated Consulting Services representative

“Working with Digital Commons during 2019-2020 has offered surprising benefits, that include an increase of journal visibility and impact, increasing citations and ranking of the journal.”

— Dr. Ahmed Abdul-Lettif, EIC Karbala International Journal of Modern Science
