

Understanding impact with SciVal

Gain insights to plan, track and demonstrate your broader research impact

Research impact is diverse, multi-dimensional, and can take decades to unfold. But while measuring this influence is challenging, it has never been more essential. Stakeholders, be it university leadership, funders or governments, face mounting pressure to articulate and substantiate their impact effectively.

Take steps to understand and demonstrate your impact today, so you can position yourself for success tomorrow.

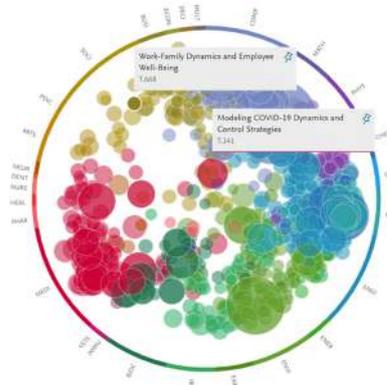

Charting a course for impact

Expand your mission control panel

Evaluate your institution's impact and trajectory using SciVal's dynamic benchmarking capabilities, based on over 40 metrics and indicators. Customize your dashboard to gain insights across the research landscape—from global and institutional views to the department, team or individual level.

Harness SciVal's insights to shape your research strategy:

- Monitor the momentum of your policy impact
- Assess innovation pathways with patent analyses
- Identify areas of strength and momentum
- Strategize to expand your research programs and attract funding

SciVal Topic analysis of active areas of research and high-momentum Topics

ELSEVIER

Advancing human progress together

“66% of academic leaders, researchers and funders say academia has a moral responsibility to incorporate real-world measures of impact into standard research evaluation”

Back to Earth: Landing Real-world Impact in Research Evaluation

Based on a survey of 400 researchers, academic leaders and heads of funding bodies globally.

Set a course for future impact

Add critical depth to your strategic reports using SciVal’s advanced analytics, which help you uncover areas of potential opportunity.

With SciVal, you can:

- Uncover existing research strengths and key contributors
- Connect with key researchers relevant to funding bodies or government initiatives
- Identify leading experts for future partnership opportunities

Showcase your broader impact on society

Gather evidence of your societal, political, technological and economic impact to demonstrate the far-reaching value of research.

With SciVal, you can:

- Connect to policy documents and policy citations from over 170 countries derived from Overton
- Incorporate LexisNexis IP DirectData patent data from 107 authorities

Amplify your impact with SciVal

SciVal’s new data sources, when combined with the robust author and affiliation profiles in Scopus®, help your organization identify key experts globally who represent outstanding partnership opportunities.

SciVal map shows the geographic spread of research influencing policy

Three ways SciVal helps you plan and deliver further impact:

1. Identify researchers influencing policy at local, national and international level to participate in policy committees or media and outreach activities.
2. Uncover innovation-driven fields and researchers, paving the way for technological and economic impact.
3. Enhance recruitment, promotion and tenure processes, grant applications and the development of impact case studies for national assessments.

By integrating SciVal into your control panel, you improve your ability to measure, communicate and propel your research impact.

What steps can you take to understand and demonstrate your impact today?
