I am Dr. Anil Reddy J, an ENT surgeon and Head of the Department at District Hospital, Ballari, India. My role involves diagnosing and treating a wide range of otolaryngological conditions, performing surgical procedures, and guiding medical teams in patient management.

What problems were you attempting to solve when you started using Clinicalkey?

I sought a comprehensive, evidence-based resource to support clinical decision-making, stay updated on recent advancements, and access reliable guidelines and surgical techniques. Having a single, trusted source for journals, textbooks, and clinical images has significantly improved my workflow.

From your point of view, what are the biggest benefits you found in using ClinicalKey in your day to day routine?

- Quick access to updated medical literature and ENT-specific guidelines
- High-quality surgical videos and reference materials for procedural guidance
- Improved patient care through better-informed clinical decisions
- Streamlined research with access to extensive journals and full-text articles

What's the primary reason you would recommend ClinicalKey?

I would recommend ClinicalKey because of its comprehensive, evidence-based content, which ensures that clinicians have access to accurate, updated information that aids in diagnosis, treatment planning, and medical education.

What benefits have you encountered since using the ClinicalKey app?

The ClinicalKey app has been particularly useful for on-the-go access to medical literature, quick referencing during patient consultations, and reviewing surgical techniques before procedures. The ability to bookmark and personalize content has enhanced its usability in my practice.
