

Reaxys is an accurate, reliable, and up-to-date chemistry platform

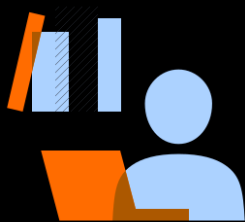

Reaxys®

For every chemist

To know more:

Reaxys helps institutions streamline research, giving faculty and students the freedom to discover more.

Whether your chemistry department focuses on basic research or education, both areas need information that is comprehensive, accurate and easy to find.

That's why we designed Reaxys. It can help faculty members conduct innovative research and develop practical applications, as well as mentor the next generation of chemists.

It is designed by chemists and technologists to make it easier for faculty and students to access and explore chemistry literature and data—helping institutions develop outstanding future chemists.

As a platform built for every chemist, Reaxys delivers:

The largest database of research and patent literature

A highly intuitive interface that interprets quickly resolves queries

Workflows designed to upskill early career researchers
