Support for the Full Academic Staff Lifecycle

A single platform to support, and see the impact of, academic staff

Interfolio's Faculty Information System (FIS) enables academic leaders to achieve strategic success. A unified platform gives leaders the visibility into faculty work and career milestones they need to drive institutional impact. Enabling hiring, evaluations, and activity reporting, the FIS is supported by advisory services from experts in educational technology and enhanced by data integrations delivered by the Interfolio Data Service.

Make recruitment more equitable and efficient

Interfolio's Faculty Search module makes workflows and collaboration around recruitment more effective and productive. Built for shared governance, Interfolio understands the demands of academic recruitment and offers intuitive tools for candidates and committee members alike. Handle the entire academic recruitment process—including the job board and applications, committee review, diversity reporting, and more—within one centralised location.

Drive fair and transparent evaluation of academics

Interfolio's Review, Promotion & Tenure module enables institutions to manage academic evaluations online. Interfolio facilitates easy collaboration between committee members with permission-based workflows. Candidates understand the requirements and can effectively tell their academic story. Conduct all your academic professional evaluations efficiently and securely online—no more binders, USB drives, or risky homegrown solutions.

Centralise academic data for strategic insights

Interfolio's Faculty Activity Reporting module centralises data collection and reporting of the teaching, research, and service activities undertaken by academic staff. Academic leaders can celebrate the impact of their academics with a birds-eye view of their holistic contributions. Additionally, they can easily query reliable data for accreditation, awards, workloads, and more.

Manage academic appointments with ease

Interfolio's Lifecycle Management module builds a complete roster of all academic staff at your institution and gives a visual representation of their professional journey—past, present, and future. Get insights into your academics through a central repository for appointment(s), terms of employment, workload allocation, upcoming reviews, eligibility for leave, contract exceptions, and more. Take action on this data to initiate cases, plan budgets, support promotions and reviews, and anticipate staffing needs.
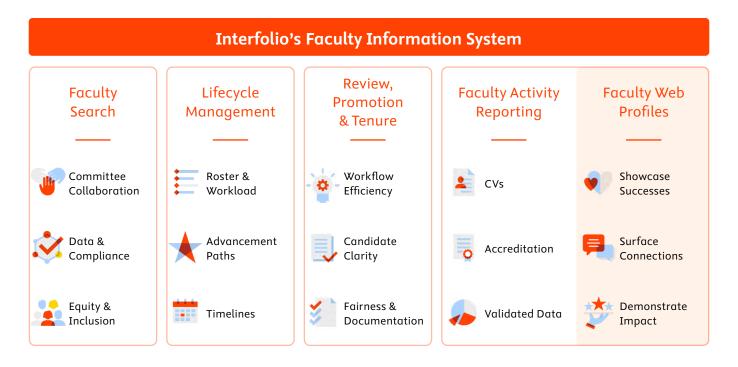

Generate robust faculty profiles on your website

Powered by Faculty Activity Reporting, Interfolio Faculty Web Profiles helps faculty tell their academic story with ease. Showcase awarded grants, teaching, service to the academic community, and indicators of wider impact, not just peer-reviewed research outputs. Plus, facilitate connections between departments and beyond your institution.

> "In implementing the two systems—FAR and RPT—from our calculations, we have seen savings of about $1.66 million per year."

Gabriel Lopez
Director of Academic Policy and Family Programs,
University of California, San Diego.

With Interfolio's FIS, you enable your academics to tell their best story with the minimum administrative burden.

The FIS brings together best-in-class technology, data, and services to manage the full faculty lifecycle. While some modules can be used independently, our vision of the FIS creates the most value as a unified platform that provides a seamless connection between the various aspects of academic work.

Interfolio's Faculty Information System

Faculty Search	Lifecycle Management	Review, Promotion & Tenure	Faculty Activity Reporting	Faculty Web Profiles
Committee Collaboration	Roster & Workload	Workflow Efficiency	CVs	Showcase Successes
Data & Compliance	Advancement Paths	Candidate Clarity	Accreditation	Surface Connections
Equity & Inclusion	Timelines	Fairness & Documentation	Validated Data	Demonstrate Impact

Academic excellence in numbers

23M	423K⁺	233K⁺	97%
Scholarly Works	Faculty Reviews	Faculty Hired	Renewal Rate

interfolio
from Elsevier

Trusted by more than 500 universities across 20 countries, Interfolio's innovative Faculty Information System enables academic leaders to achieve strategic success and drive institutional impact.

The most comprehensive platform of its kind, the Interfolio Faculty Information System streamlines processes for faculty hiring and recruitment, academic appointments and timelines, activity data reporting, and reviews and promotions.
