Research Intelligence

Maximize your institutional insights with Funding Institutional

The research funding landscape is hyper-competitive and time-consuming. Funding availability is decreasing, while the number of competing proposals is on the rise; meanwhile, researchers spend upwards of 40% of their time seeking funding instead of conducting research.

Funding Institutional provides a holistic view of the research funding landscape. It combines over **40k+ active and recurring opportunities** with information on **8M+ awarded grants** from a wide range of global government and private funders. Institutional Administrators can also add internal opportunities to provide a single-source solution for discovering funding opportunities.

Designed to provide timely and accurate funding opportunities from more than **15k+ funders**, Funding Institutional offers insight into research that has already been funded in any area of interest.

Gain insights with the most extensive awarded grants dataset

Attain an in-depth understanding of the funding landscape by combining awarded grants data with active funding opportunities. Access to the most comprehensive dataset with 8M+ awarded grants.

Search and discover new funding sources

Identify opportunities and funders by research area, keywords or researcher profiles. Stay current by saving your search criteria to discover additional relevant awards in a timely manner.

Streamline workflows with product integrations

Funding Institutional links with Pure, Scopus, SciVal, and can be integrated with institutional websites and CRIS systems using public APIs to support the entire research project lifecycle.

Stay up-to-date with the latest relevant opportunities

Track opportunities of interest to be alerted as soon as they are updated or when a deadline is approaching. Export data to Excel/CSV for detailed analysis and intelligence.

Prioritize opportunities based on relevance and competitive intelligence

Identify funders who have previously awarded grants to your institution or area of interest. Filter by eligibility, geography, limited submissions and other criteria to discover the most relevant funding opportunities.

Disseminate opportunities quickly and efficiently

Effortlessly share relevant funding opportunities by email or by sharing a direct link to an opportunity.
