

How Pure supports users across your institution

With the right tools, your institution can overcome fragmented systems and data silos to achieve your strategic goals. Organized, accessible data unlocks opportunities in recruitment, showcasing, collaboration, and funding — critical areas for success.

Our research information management system (RIMS) **Pure** has helped more than 300 research institutions and organizations worldwide integrate and link insights from disparate systems and data sources.

Institutional leaders

Key priorities: Strategy, efficiency, return on investment, reputation.

How Pure can help

- Increases the global visibility of the institution.
- Enables teams to capitalize on funding opportunities.
- Streamlines faculty and program assessments.
- Delivers comprehensive analytics to inform resource allocation and target setting.

Outcome: Better strategic alignment; faster, more confident decisions; greater institutional visibility.

“[Solutions like Pure] can tell you things about your citation indices that can help you build your academic reputation... can help you focus resources... can undertake trend analysis... can help faculty understand how their scholarship helps the university to advance.”

David Weindorf
Vice President of Research and Innovation,
University of Central Michigan, USA

Research management officers

Key priorities: Funding, efficiency, compliance, reporting.

How Pure can help

- Automates the collection and integration of millions of research activity data points.
- Improves the accuracy, speed and cost of reporting.
- Supports identifying grant opportunities and relevant applicants, streamlines applications.
- Helps track trends, spot stars and cultivate collaboration.

Outcome: Reduced administrative burden; stronger reporting and analytics; improved compliance and risk management; better support for researchers.

Library and information science specialists

Key priorities: Support researchers, demonstrate value, manage the institutional repository (IR).

How Pure can help

- Provides researchers with access to state-of-the-art search and analytics tools.
- Enhances training and support for core research activities and compliance.
- Drives compelling stories and vibrant public profiles of research output, expertise and impact.
- Integrates with IRs, greatly reducing the time burden on the library and researchers.

Outcome: Streamlined workflows; improved researcher engagement; greater research visibility.

“With Pure’s Awards Management Module, award records are created within 24 hours, funding acceptance packages are released to researchers and staff in 48 to 72 hours.”

Dr Simon Barrett

Deputy Director, Research Office,
Monash University, Australia

“...we do ad hoc analysis on the data. So, we’re using it all the time and researchers know that. And then, of course, the publicity you get through the portal, that’s very important encouragement for researchers.”

Aija Kaitera

Research Services Developer,
University of Helsinki, Finland

Information technology specialists

Key priorities: Security, scalability, integration.

How Pure can help

- Certified under ISO/IEC 27001:2013 policies, standards and guidelines.
- Secure interoperability among internal and external systems with continuous software development.
- Modular design that can grow with institutional needs and flexible permissions and workflows.

Outcome: No additional staffing required; system reliability; automatic updates and enhancements.

Researchers and faculty

Key priorities: Research productivity and quality, collaboration, funding, impact and evaluation.

How Pure can help

- Streamlines workflows and frees up time to focus on other tasks.
- Provides a public profile of their research and achievements, showcasing expertise to potential collaborators and the media.
- Highlights societal impact and contributions to the United Nations Sustainable Development Goals.

Outcome: Higher productivity; greater profile; increased collaboration.

“Developing an in-house solution is not cheaper than having a system like Pure... this is an expert system.”

Michael Greil

Head of Research Information System,
University of Vienna, Austria
