CLINICALKEY AI DISCOVERY INSIGHTS

Dr. Carl Decker

I am Dr. Carl Decker, a board certified diagnostic radiologist for 20 years. I am currently a general radiologist with an interest in mammography.

Before using ClinicalKey AI, what was your perception of the use of AI in healthcare? Have you previously used any AI tools in your workflow?

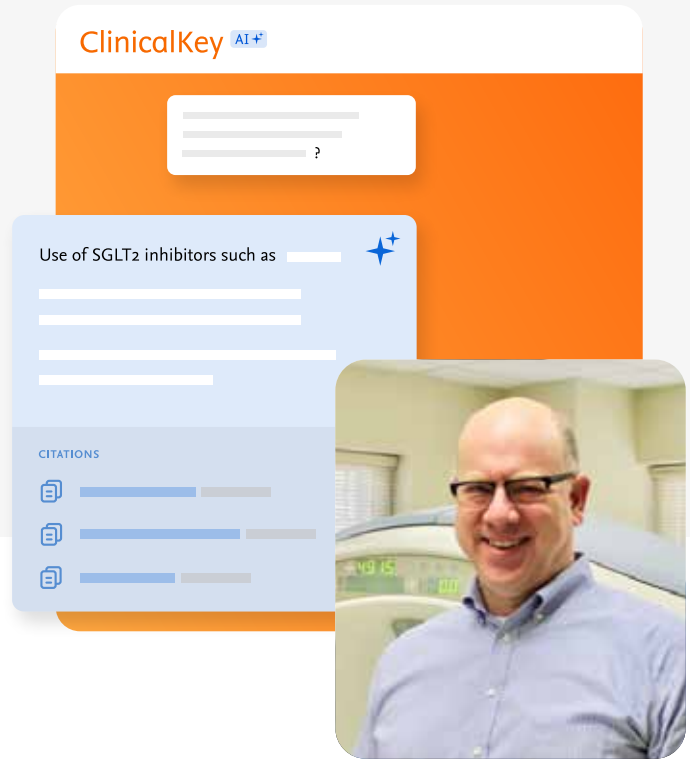

I was excited at the prospect of using AI in the work setting. As a mammographer I have used CAD and AI based software for some time as a tool in interpreting mammograms; before ClinicalKey AI, I used ChatGPT and a specially designed bot for radiology.

What challenges were you facing before ClinicalKey AI was incorporated into your workflow?

Getting references was my biggest challenge. ClinicalKey AI's link to references and the availability of the articles is KEY to my subscription to your service.

What benefits have you experienced since using ClinicalKey AI?

CME is great! Article links are excellent. Answers are well tailored. I would say I am reaching differential diagnoses quicker using ClinicalKey AI but this is less important to me than the links/references.

What impact has ClinicalKey AI had on your care delivery and efficiency?

I use ClinicalKey AI most days. It helps me to hone my differential diagnoses on several cases each day.

What advice would you give to a colleague considering using ClinicalKey AI?

Strongly consider the superior nature of ClinicalKey AI given CME, links to articles and tailored answers. ClinicalKey AI helps to consider differentials that you might otherwise overlook.

What subscription type did you select when purchasing ClinicalKey AI, and why?

Annual. It was on sale around Christmas.

"ClinicalKey AI helps to consider differentials that you might otherwise overlook"

Individual subscriptions now available. Experience ClinicalKey AI free for 14 days.
