Researchfish helps us to collect a wealth of information on the outputs and outcomes of our research—it gives us some of the raw data to help us articulate impact and evaluate our research further along that pathway. We've used the data collected via Researchfish for many useful analyses, but if I had to pick one to highlight then the sheer scale and breadth of our research collaborations was pretty eye opening.

Andrew Knowles

Senior Research Evaluation Manager
Cancer Research Foundation

Researchfish is used globally by research funders and higher education institutions to track research and evidence impact.

The platform uses technology and algorithms to collect outcomes and outputs of research from the web, external data sources, and the researchers themselves.

16 Common outcomes (pathways to impact)—publications and beyond

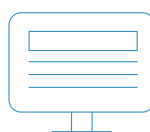

Researchfish collects and enriches data for 16 standard outcomes that can be uniquely attributed to specific awards.

Researchfish collects and enriches data for 16 standard outcomes beyond bibliometrics that can be uniquely attributed to specific awards. Are you ready to start collecting this extensive outcome range?

22,000

More than 22,000 external data sources feed into Researchfish data. Are you ready to identify pathways to impact?

200

More than 200 funding organizations and universities benefit from using Researchfish. Are you ready to join them?

4.5

More than 4.5M outputs reported via Researchfish. Are you ready to report yours?

180,000

More than 160,000 awards tracked via Researchfish. Are you ready to track yours?
