

Digital Commons Institutional Repository

“Because Digital Commons is **fully hosted**, we were free to focus on the content and did not have to worry about the technology.”

— Pin Pin Yeo, Head of Scholarly Communication (SMU Libraries)

Research Intelligence

Showcase your institution's full scholarly output

The Digital Commons institutional repository is a best-in-class, hosted, configurable digital platform with a suite of offerings for showcasing an institution's research output. Digital Commons helps institutions increase visibility and build a global reputation by showcasing the full spectrum of your scholarly output and is optimized for discovery on the open web, with metrics to demonstrate impact around the world.

As partners in digital management, our Institutional Repository has five key features to support your institution:

- Hosted + fully supported platform
- Unlimited storage
- Robust, reliable metrics on an intuitive dashboard
- Professional-grade publishing tools
- Industry-leading Search Engine Optimization (SEO)

We grow as you do!

Digital Commons provides unlimited storage and is always increasing support for new content types and larger file sizes.

Host and showcase the full breadth of your university's scholarship on Digital Commons

- Lectures

Digital Commons offers a full suite of tools to demonstrate impact

Digital Commons offers the most robust, reliable metrics on an intuitive dashboard to help you better identify research trends, potential funders, collaborations, and report on the difference your institution's work makes around the world.

“[Our repository] is a very important and integral part of having our **research made available to the world.**”

—Professor Lily Kong, President and Lee Kong Chian, Chair Professor of Social Sciences

Digital Commons is a multipurpose digital platform with tools and services that support research sharing:

Digital Commons is an open platform for institutions to showcase their research output over many content types in a global audience. The institutional repository offers harvesting tools to auto populate your institutional repository from sources such as PubMed, ORCID, and is integrated with Pure and Scopus.

We offer unlimited support and training through our customer support team with assigned consultants unique to your institution. The institutional repository supports best practices through collection development policies, metadata assignment, content organization and display.
