## Discovery insights from... Dr Rosalinda Fuentes

### 1. Please briefly describe who you are and your role?

My name is Rosalinda Fuentes, I am a recent graduate from University of Monterrey School of Medicine (Mexico) and I currently work as a Remote Care Specialist/Medical Scribe for MD Medical Group which provides primary care healthcare services across the United States.

### 2. What problems were you attempting to solve when you started using ClinicalKey?

I first came across ClinicalKey as a medical student at University of Monterrey School of Medicine (Mexico). ClinicalKey had a variety of resources that were crucial to my medical learning, especially during my clinical rotations, since I had to have access to updated information that came from a legitimate medical source.

### 3. From your point of view, what are the biggest benefits you found in using ClinicalKey in your day to day routine?

One of the biggest advantages that ClinicalKey has is the variety of resources it offers, ranging from journals, books, to quick reference guidelines that are easy to read and understand. Not to mention that it allows you to have good quality medical knowledge at your finger tips.

### 4. What's the primary reason you would recommend ClinicalKey?

ClinicalKey is an invaluable tool that can easily be used by the medical community, from medical students to experienced physicians. The materials it offers can be easily found according to the user's needs. Also, as previously mentioned, it allows you to have quick reference guidelines, videos, and books that belong to an internationally recognised medical editorial house, which allows medical professionals across the globe to have access to relevant scientific information.

### 5. Is it important in your daily clinical activity to have access to diagnostic support tools?

Yes, the medical world is constantly updating and changing every day. Having an accurate diagnostic tool that allows the healthcare provider to provide accurate and updated standards of care and management supported in verified medical literature is mutually beneficial to both the medical community and the people we serve.

*ClinicalKey is an invaluable tool that can easily be used by the medical community, from medical students to experienced physicians.*
